**II.1.4. Information about framework agreement**

### **II.1.5. Short description of the contract or purchase(s)**

DONG Energy wishes to extend the numbers of gear oils available for Siemens Wind Turbines 3.6 MW, and to extend the life time of the gear oils in order to minimize the number of oil changes during the life time of the wind turbines. For this purpose DONG Energy wishes to purchase and test 2 different gear oils on two Siemens Wind Turbines (3.6 MW, owned by DONG Energy) located in Avedøre Holme near Southern Copenhagen.

The object for the gear oils tested will be the technical performance, especially the expected lifetime.

The OEM of the gearboxes on Siemens Wind Turbine 3.6 MW is Winergy, and it is therefore mandatory that the gear oil is approved by Winergy for testing or for use. In case that the applicant's intended gear oil has not yet reached final approval by Siemens Wind Power, then the result from Avedøre may be used by the supplier towards Siemens Wind Power in order to get the final approval.

The test will last for two years after commencement of the test, and at that time a preliminary conclusion shall be made, but the oils used for testing will be kept on the Avedøre Holme wind turbines for the remaining life time of the oils unless other factors necessitates an oil change.
