Legal type of the buyer: Public undertaking, controlled by a central government authority
Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: 81322574-Acelerando la transición hacia la economía circular, la gestión de los residuos y las tecnologías neutras en carbono
Description: Despite Peru"s progress in developing national and sectoral strategies for the circular economy and climate change mitigation, significant implementation challenges remain. Circular practices are still limited among micro, small, and medium-sized enterprises (MSMEs), which make up the vast majority of the country"s industrial and commercial base. Likewise, the adoption of carbon-neutral technologies-such as energy efficiency, renewable self-generation, and digital optimisation-remains in its early stages. Structural barriers include fragmented governance, limited technical capacities, weak inter-institutional coordination, restricted access to financing, the absence of scalable business models, and the lack of a circular value chain perspective among anchor companies and their supplier networks. In this context, GIZ is implementing the technical cooperation project "Circular economy for climate-friendly urban development II - ProCircular" between 2025 and 2027 and will launch the project "Use of carbon-neutral technologies to scale up mitigation measures in strategic sectors - ProEficiencia" in 2026. ProCircular aims to enhance the adoption of resource-efficient and climate-friendly circular economy practices among companies in the manufacturing and commerce sectors across selected value chains. In parallel, ProEficiencia focuses on promoting the integrated use of carbon-neutral technologies in the same sectors, in support of Peru"s Nationally Determined Contributions (NDCs). Both projects target companies in the food, beverage, and domestic trade sectors, relevant ministries, business associations, and financial institutions. The ProCircular project, its political counterpart is the Ministry of Production. Its outputs are: (i) Improving the enabling conditions for circular value chains through systemic interventions, (ii) Developing business models in circular value chains, and (iii) Disseminating and transferring good practices from circular value chain models through systemic interventions. On the other hand, the ProEficiencia Project, its political counterpart is the Ministry of the Environment. Its outputs are: (i) Improved coordination of the use of carbon-neutral technologies and practices throughout value chains, (ii) Increasing availability of business models for the use of carbon-neutral technologies and practices that take gender issues into account throughout value chains, and (iii) Improved conditions for scaling up gender-sensitive approaches to the use of carbon-neutral technologies and practices. These

initiatives aim to strengthen the implementation of integrated circular economy approaches and carbon-neutral technologies within Peruvian companies, particularly within the manufacturing and commerce sectors. Both projects form part of the Peru-Germany Climate Alliance, a bilateral initiative that supports Peru's transition towards a sustainable, inclusive and low-carbon economy.

Title: 81322574-Acelerando la transición hacia la economía circular, la gestión de los residuos y las tecnologías neutras en carbono
Description: GIZ is implementing the technical cooperation project ProCircular between 2025 and 2027 and will launch the ProEficiencia project in 2026 in Peru. ProCircular aims to enhance the adoption of resource-efficient and climate-friendly circular economy practices among companies in the manufacturing and commerce sectors across selected value chains. In parallel, ProEficiencia focuses on promoting the integrated use of carbon-neutral technologies in the same sectors, in support of Peru"s Nationally Determined Contributions (NDCs). Both projects target groups: - Companies with a significant environmental footprint and potential for circular and low-emission innovation; - Technical and managerial staff from public institutions (e.g., PRODUCE, MVCS, MINAM, regional governments); - Business support entities such as Centres for Productive Innovation and Technology Transfer (CITEs), Chambers of Commerce, and specialised technical service providers; - Women-led enterprises and stakeholders, particularly in underrepresented value chains and regions. The contractor will support the implementation of the following working packages: For ProCircular, the working package and main activities are: Work Package 1: Scaling up good practices in circular economy business models with a value chain and gender approach. This package aims to strengthen the enabling conditions so that successful circular economy practices can be adopted, replicated and scaled up at territorial and business levels. There is a particular focus on encouraging the participation of women and regional stakeholders. 1.1 Awareness

campaign on circular business models and gender equality. 1.2 Partnerships for knowledge transfer on circular economy and gender equality. 1.3 Strengthening CITEs, chambers of commerce, and regional actors in circular economy implementation 1.4 Organising exchange visits and study tours on circular economy For ProEficiencia, the working packages and main activities are: Work Package 2: Strengthening inter-institutional and intergovernmental coordination mechanisms. This package aims to strengthen the coordination mechanisms between institutions and governments to promote carbon-neutral technologies and practices within the manufacturing sector's value chains and domestic trade. 2.1 Strengthening national and regional coordination mechanisms to promote the use of carbon-neutral technologies throughout value chains 2.2 Creating and harmonising regulatory, technical, and promotional instruments that support the adoption of carbon-neutral technologies, with a focus on gender and territorial inclusion Work Package 3: Strengthening the knowledge of key actors in the productive ecosystem and promoting experience exchange. The aim of the package is to strengthen the knowledge of key players in the productive ecosystem and promote the exchange of experiences on energy efficiency and carbon-neutral technologies, with an emphasis on the participation of MSMEs, women and regions with less access to technological solutions. 3.1 Establishing regional learning networks 3.2 Promoting gender-sensitive learning formats 3.3 Providing advisory services for the development of specialised technical assistance 3.4 Facilitating exchanges with international networks of good practices Expected contribution and implementation approach: These services are expected to contribute to the operationalisation of national roadmaps, enhancing the competitiveness and environmental performance of Peruvian enterprises and aligning them with international sustainability standards, particularly those of the European Union. Given the urgent need to scale up circularity and decarbonisation, consultancy services should be delivered flexible, in a coordinated and results-oriented manner, ensuring synergies with existing platforms and other donor-funded initiatives.
Internal identifier: 81322574

5.1.1. Purpose

Main nature of the contract: Services
Main classification (cpv): 75211200 Foreign economic-aid-related services
Additional classification (cpv): 79411100 Business development consultancy services, 80400000 Adult and other education services

Options:

Description of the options: GIZ may optionally commission contract amendments and/or increases based on the criteria in the tender documents to the successful bidder of this tender. For details, please see the terms of reference.

5.1.2. Place of performance

Country: Peru
Additional information: Perú

5.1.3. Estimated duration

Duration: 30 Months

5.1.4. Renewal

Maximum renewals: 2
Other information about renewals: GIZ may optionally commission contract amendments and /or increases based on the criteria in the tender documents to the successful bidder of this tender. For details, please see the terms of reference.

5.1.6. General information

Procurement Project not financed with EU Funds.
The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.7. Strategic procurement

Aim of strategic procurement: Reduction of environmental impacts
Description: Compensation of CO2 emissions for flights
Aim of strategic procurement: Fulfilment of social objectives
Description: Mitigation Measures To address the risks of reproducing gender inequalities and the underrepresentation of women in technical or decision-making spaces, the contractor must first implement explicit mechanisms to actively promote and encourage the balanced participation of women in all project activities, including training, platforms and regulatory validation processes. Second, gender indicators should be integrated into results monitoring, which implies not only disaggregating data by sex, but also identifying differentiated impacts on women and men. Third, the risk of gender bias in training content and methodologies will be mitigated by reviewing materials with a gender perspective and validating them with women's organizations. Promotional measures The contractor shall actively promote women's leadership in multi-stakeholder platforms and learning networks, prioritizing profiles of women entrepreneurs, technicians or trade union representatives. Likewise, the production of communicational contents that make visible business models led by women in circular economy, energy efficiency and clean technologies will be encouraged. Finally, the development of productive initiatives or pilots with a gender focus will be encouraged, assigning specific resources or technical support to ensure their sustainability. The experiences and results achieved in the promotion of gender equality and differentiated impacts on women and men will be disseminated, both in events and in the contractor's written documentation and reports.
Approach to reducing environmental impacts: The protection and restoration of biodiversity and ecosystems, The transition to a circular economy, Climate change adaptation, Climate change mitigation
Social objective promoted: Ethnic equality, Gender equality, Human rights due diligence in global supply chains, Other

5.1.10. Award criteria

Criterion:
Type: Price
Name: Price
Description: Consideration of the price through the valuation method "Bestangebots-Quotienten-Methode"
Category of award weight criterion: Weight (points, exact)
Award criterion number: 30
Criterion:
Type: Quality
Name: Erreichte Gesamtpunktzahl nach fachlicher Wertung (inkl. Mindbed.)
Description: Zur Ermittlung des wirtschaftlichsten Bieters wird hier von der Vergabestelle die erreichte Gesamtpunktzahl nach fachlicher Wertung eingetragen. Es werden nur Angebote mit einer fachlichen Bewertung von mindestens 500 Punkten gewertet. Fachliche Angebote mit weniger Punkten scheiden als fachlich ungeeignet aus.
Category of award weight criterion: Weight (points, exact)
Award criterion number: 70
Criterion:
Type: Quality

Name: Erreichte Gesamtpunktzahl nach fachlicher Wertung (inkl. Mindbed.)
Description: Zur Ermittlung des wirtschaftlichsten Bieters wird hier von der Vergabestelle die erreichte Gesamtpunktzahl nach fachlicher Wertung eingetragen. Es werden nur Angebote mit einer fachlichen Bewertung von mindestens 500 Punkten gewertet. Fachliche Angebote mit weniger Punkten scheiden als fachlich ungeeignet aus.
Category of award threshold criterion: Minimum score
Award criterion number: 500

5.1.15. Techniques

Framework agreement:
No framework agreement
Information about the dynamic purchasing system:
No dynamic purchase system

5.1.16. Further information, mediation and review

Review organisation: Vergabekammern des Bundes
Information about review deadlines: According to Article 160, Section 3 of the German Act Against Restraint of Competition (GWB), application for review is not permissible insofar as 1. the applicant has identified the claimed infringement of the procurement rules before submitting the application for review and has not submitted a complaint to the contracting authority within a period of 10 calendar days; the expiry of the period pursuant to Article 134, Section 2 remains unaffected, 2. complaints of infringements of procurement rules that are evident in the tender notice are not submitted to the contracting authority at the latest by the expiry of the deadline for the application or by the deadline for the submission of bids, specified in the tender notice. 3. complaints of infringements of procurement rules that first become evident in the tender documents are not submitted to the contracting authority at the latest by the expiry of the deadline for application or by the deadline for the submission of bids, 4. more than 15 calendar days have expired since receipt of notification from the contracting authority that it is unwilling to redress the complaint. Sentence 1 does not apply in the case of an application to determine the invalidity of the contract in accordance with Article 135, Section 1 (2). Article 134, Section 1, Sentence 2 remains unaffected.

6. Results

Value of all contracts awarded in this notice: 901 745,00 EUR

6.1. Result lot identifier: LOT-0001

Winner selection status: At least one winner was chosen.

6.1.2. Information about winners

Winner:
Official name: Consortium NIRAS Germany GmbH - Dorsch Impact GmbH
Tender:
Tender identifier: 3 - 92945
Identifier of lot or group of lots: LOT-0001
Value of the tender: 901 745,00 EUR
The tender is a variant: no
Subcontracting: Not yet known
Contract information:

Identifier of the contract: 1
Title: IP Consult, Institut für Projektplanung GmbH, 70469 Stuttgart
Date of the conclusion of the contract: 09/06/2026

6.1.4. Statistical information

Received tenders or requests to participate:
Type of received submissions: Tenders
Number of tenders or requests to participate received: 4
Type of received submissions: Tenders submitted electronically
Number of tenders or requests to participate received: 4
Type of received submissions: Requests to participate
Number of tenders or requests to participate received: 11
Type of received submissions: Tenders from tenderers registered in other European Economic Area countries than the country of the buyer
Number of tenders or requests to participate received: 2
Type of received submissions: Tenders from tenders registered in countries outside of the European Economic Area
Number of tenders or requests to participate received: 0
Type of received submissions: Tenders verified and inadmissible
Number of tenders or requests to participate received: 0
Type of received submissions: Tenders verified and inadmissible because of an abnormally low price or cost
Number of tenders or requests to participate received: 0
Range of tenders:
Value of the lowest admissible tender: 748 071,00 EUR
Value of the highest admissible tender: 979 705,00 EUR
