#### **II.2.3. Place of performance**

NUTS code: NO Norge

#### **II.2.4. Description of the procurement**

In general the project manager must have the capability for process management and project management for several processes, carry out a procurement process, and manage the implementation of the new systems. The role of the project manager in the implementation of the new systems will include follow-up of the chosen suppliers and systems, ensure necessary progress, and function as a contact point for users, NKS110 IKS, and the 110 exchanges. The systems are critical infrastructure, so there are particularly strict requirements for suitability for the project manager who is awarded the assignment. The project manager must ensure integration and coordination between the overlapping systems and projects, and will be responsible for integrations, including the communication system with other stand-by plans. The project manager ought therefore to have experience from critical infrastructure, the ability to manage and have control of major and complex processes, as well as in-depth knowledge of technical systems, updates, and the development of systems. For a description of the need and delivery, refer to the attached contract SSA-O and annexes.
