Direct award

:

Justification for direct award: The contract can be provided only by a particular economic operator because of an absence of competition for technical reasons

Other justification: The contracting entity requires the build, transition, implementation, operation, support and transition; including quality and related verifications, of postcode generation (the solution) during the term to support the continued operation of the national postcode service. The contracting entity must ensure that the national postcode service is fully operational in the short term upon expiry of a predecessor contract meaning that the solution must be fully rolled out, and integrated into the wider service, by that time. The successful tenderer is the original supplier of the solution which is currently integrated into the existing postcode service. The successful tenderer has unique technical and operational knowledge of the system. The system is a complex, unique and customised knowledge-based platform supporting multi-stage processes, the effective operation and maintenance of which require both technical expertise and familiarity with its established day-to-day processes developed and refined over time. The wider postcode service is a critical public service. No other supplier could either develop an alternative solution, take over the existing system, or integrate an alternative solution into the wider architecture and structure of the national postcode service in the time required.
