2.1. Procedure

Title: LA3665C - RFT for the Supply, Delivery, Installation and Commissioning of an Isothermal Titration Calorimeter for South East Technological University (SETU)

Description: South East Technological University request the supply of an Isothermal Titration Calorimeter. It will function as shared analytical infrastructure supporting multidisciplinary research across pharmaceutical sciences, biotechnology, and materials science, strengthening experimental throughput and advanced skills in biophysical analysis. It will directly underpin high-impact publications, competitive funding applications, and mechanistic insight critical to rational formulation and drug-development workflows. It will enhance translational relevance by de-risking candidate selection through rigorous thermodynamic profiling aligned with industry-standard decision-making; and it will deliver long-term strategic value by embedding advanced calorimetric analysis as an institutional capability, improving data robustness, reproducibility, and the attractiveness of the research environment for academic and industry collaboration.
