II.1.4. Short description

The targeted early intervention service provides the opportunity to improve the outcomes for children and young people with moderate mental health problems. It is being commissioned in response to strategic priority 5 of the Derbyshire and Derby Future in Mind plan. Our aim is to consolidate, stabilise and strengthen our offer to children, young people and families based on feedback from existing service provision and learning to date. The service is intended to support those children who need more specialist support than can be provided by schools, primary care, local authorities and more general services for children in communities, but who do not meet current specialist CAMHS thresholds. The intention is to provide short evidence-informed interventions as needs emerge to improve outcomes and reduce the need for future more intensive CAMHS interventions and reduce the likelihood of them developing a more serious mental health condition because of the timely support they will receive.

The service will deliver:

- improvement/stabilisation in the mental health of children and young people who are referred to the service,
- improvement in the support to parents and carers (parents will report that they are better /able to help their child as a result of the support they received).

The overall ambition is for there to be provision across Derby and Derbyshire offered in communities for 0-17 years and skill mix to meet a wide range of needs.

The overall aim of the Targeted Early Intervention service is to deliver targeted “direct work” with children and young people and their families that will improve/manage the young person’s mental health and wellbeing, and provide them with tools so that, as far as possible, they are enabled to maintain and improve their own mental wellbeing.
