II.2.3. Place of performance

NUTS code: NO Norge

II.2.4. Description of the procurement

The sub-contract is for the procurement of PC clients, PC monitors, and additional equipment. There are several factors that will influence the number of units that will be procured under this sub-contract, from the lifetime of the units procured under the contract, to the use of additional services and price changes. The most decisive factor for the scope of the sub-contract is the number of government entities that join or leave.

There are 167 government entities covered by this sub-contract. Based on the number of employees in these entities, we estimate that the annual procurements will be approx. 20,000 PC clients and 25,000 PC monitors.

With the inclusion of an estimate of the procurements of additional equipment and additional services, sub-contract 1 will have an estimated annual value of approx. NOK 650 million.

Attention is drawn to the fact that the estimates are not binding for the contract owner and contracting authorities. The maximum value over the contract period, including option periods, will be NOK 3.500 billion.

II.2.5.

Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.4. Description of the procurement

This sub-contract covers the procurement of Mac and additional services.

There are several factors that will influence the number of units that will be procured under this sub-contract, from the lifetime of the units procured under the contract, to the use of additional services and price changes. The most decisive factor for the scope of the sub-contract is the number of government entities that join or leave.

There are 167 government entities covered by this sub-contract. Based on the number of employees in these entities, we estimate that the annual procurements will be approx. 6,400 Macs under this sub-contract.

With the inclusion of an estimate of the procurements of additional equipment and additional services, sub-contract 2 will have an annual value of approx. NOK 150 million. Attention is

drawn to the fact that the estimates are not binding for the contract owner and contracting authorities. The maximum value over the contract period, for sub-contract 2, including the option periods, will be NOK 800 million.

These estimates are very uncertain, as it is the first time that a joint government contract will be established for the procurement of Mac, and the contract owner does not have good data and statistics for the product area. At the same time, the procurements of PCs from other manufacturers are far more widespread in the public sector.

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Requirement:

Tenderers must be registered in a company register, professional register or a trade register in the country where the tenderer is established.

Documentation:

- Norwegian tenderers: Company registration certificate
- Foreign tenderers: Verification that the tenderer is registered in a company register, trade register or a commerce register in the country where the tenderer is established.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

Requirement:

Tenderers must have relevant experience from comparable deliveries as described in the tender documentation. Comparable means:

- Customers with a large geographical spread
- Large number of delivery locations

Documentation requirement:

- Description of the tenderer's 3 most relevant contracts in the last 3 years.

The description must include information of the assignment's value, date and recipient. It is the tenderer's responsibility to confirm relevance through the description.

If a tenderer cannot refer to minimum three relevant deliveries in the last three years, documentation of relevant deliveries older than 3 years will be taken into consideration, however not older than 5 years.

Requirement:

Tenderers must have sufficient capacity and resources to execute the contract.

Sufficient capacity and resources to execute the contract means being able to deliver each sub-contract's estimated volume to a large number of government entities over a large geographical area.

Documentation requirement:

- A statement must be given for the tenderer's average annual workforce and the number of employees in management in the last three years.

If the tenderer uses the capacity of other businesses, it must be documented that that tenderer has authority over the necessary resources by presenting a commitment statement from these businesses, see Annex 10: Commitment Statement Template.

Requirement:

Tenderers must have a quality assurance system that is relevant for the delivery, including a system for traceability in the supplier chain for the products covered by the joint contract.

Documentation requirement:

- Certificate for the tenderer's quality assurance system issued by an independent organ confirming fulfilment of quality assurance standards such as ISO 9001 or equivalent certificates issued by organs in other EEA countries.

The contracting authority will accept other documentation of equivalent quality assurance measures if the tenderer does not have the possibility to obtain such certificates by the deadline, and this is not the tenderer's fault. This requires that the tenderer documents that these measures are equivalent to the requested quality assurance standard.

Requirement:

Tenderers must have procedures for environmental management measures that contribute to minimising environmental impact.

Documentation requirement:

- Tenderers can document this by a certificate from EMAS, ISO 14001, the Eco-Lighthouse scheme, or equivalent certificates issued by organs in other EEA countries.

The contracting authority will accept other documentation of equivalent environmental management measures if the tenderer does not have the possibility to obtain such certificates by the deadline, and this is not the tenderer's fault. This requires that the tenderer documents that these measures are equivalent to the requested environmental management systems or standards.
