Main site or place of performance: Dublin

#### **II.2.4. Description of the procurement**

The Central Bank is seeking the provision and implementation of a Market Surveillance System inclusive of licensing, support and maintenance (together the "Solution"). The Solution will provide the Central Bank as a market regulator and supervisor with the capacity to monitor markets in financial instruments for the purpose of protecting market integrity through automated detection and follow-up analysis of possible instances of market abuse (insider dealing and market manipulation).

The Solution must be capable of ingesting trading and market-related data from a number of sources and perform requisite processing and analysis in order to identify, on a daily basis, potential instances of market abuse. The Solution will also provide functionality to search and interrogate data for the purpose of investigating possible market abuse, and will incorporate robust and secure record keeping and tracking characteristics. The Solution will provide the Central Bank with the capacity to generate regular and ad-hoc reports based on the data contained within it. The Solution should incorporate an efficient and intuitive user interface incorporating effective and complementary visual and graphical display options and functionality.

Please see attached documentation for more information.
