I.2. Information about joint procurement

The contract involves joint procurement

I.3.

Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: <https://permalink.mercell.com/182009498.aspx>

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted electronically via: <https://permalink.mercell.com/182009498.aspx>

I.4. Type of the contracting authority

Regional or local authority

I.5. Main activity

General public services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

2022- EEA - Collection, storage, transport and final treatment of municipal industrial waste, second announcement

II.1.2. Main CPV code

90500000 Refuse and waste related services

II.1.3. Type of contract

Services

II.1.4. Short description

The aim of the procurement is to cover the six collaborating municipalities' need for waste collection services for industrial waste.

The procurement is for the site addresses listed in the annex for each municipality, with the changes that can occur in the contract period. The contract will be valid from 01.01.2023.

The collaborating municipalities are

- Bjørnafjorden Municipality
- Kvam Municipality
- Osterøy Municipality
- Samnanger Municipality
- Vaksdal Municipality
- Askøy Municipality

All the types of waste that are listed in the contracting authority's description and annex on options will be included in the contract. There can be some changes in the contract period to collection addresses based on the activities in the individual municipalities. If during the contract period there is a need for waste collection services related to other waste fractions than those in the description and annex, they will be included in the price sheet at a later date.

II.1.5. Estimated total value

Value excluding VAT: 40 000 000,00 NOK

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

44613700 Refuse skips, 90510000 Refuse disposal and treatment, 90511000 Refuse collection services, 90512000 Refuse transport services, 90513000 Non-hazardous refuse and waste treatment and disposal services, 90520000 Radioactive-, toxic-, medical- and hazardous waste services

II.2.3. Place of performance

NUTS code: NO0A2 Vestland

II.2.4. Description of the procurement

If the tenderer discovers any ambiguities in the tender documentation, we ask that this be pointed out before the deadline for submitting questions.

The following services will also be included in the contract and price:

- Preparation and updating of waste plans
- Hire of containers
- Emptying containers; collecting waste fractions in accordance with the waste plan
- Placing the containers back at the collection site
- Placing and collection of functional and suitable collection units, as well as repair of containers as needed
- Delivery of collection sacks for mixed plastic waste
- Delivery of safe packaging for hazardous waste and risk waste, including pricking and cutting, e.g. needle tips
- Handling of EE waste and special waste in line with the applicable regulations
- Treatment of fractions for recycling and final disposal
- Registering and logging of data on the sorting degree, quantity and type of waste specified by the individual entity, as well as periodical reporting of registered data within each municipality
- Internet based solutions so that the contracting authority's entities can control and optimise their waste management, including waste quantity, sorting degree, container size and number, collection frequency and the individual price elements connected to the services.
- Information and training activities for the contracting authority and it's entities
- Annual review of statistics with a focus on achieved optimisation of the waste solutions.

The list above is not considered exhaustive in as far as the measures can relate to the contract content and purpose.

Expanded description:

Combustible residual waste

The service covers the hire of containers, their placement, collection, and transport of waste from prior defined collection locations to a facility for final treatment, as well as emptying.

Allowances must be made for some of the waste being incorrectly sorted.

It is a prerequisite that the service is carried out based on the scheduled plan that includes frequencies for emptying per week, per 14 days, and per 4 weeks. The attached 'emptying calendar' includes an overview of collection locations, relevant container volumes, and collection frequencies.

The annex is a guideline, but not exhaustive, to the current situation.

Changes will come as a result of the contracting authority's need for capacity and as regards the use of the collection locations.

The service also includes maintenance, replacements, placement and collection of containers, both at the start-up and end of the service, but also for ongoing changes that arise during the contract period.

The service must be seen as complete, in the sense that everything that can reasonably be included in the provision of the service must be included in the offered unit prices.

Final treatment of combustible residual waste.

The service includes the final treatment of combustible residual waste, and includes all costs connected to the final treatment after the waste has been delivered to a facility that is certified for final treatment. This service is to be priced separately per kilo. A calculation factor of 0.11 is used in the relationship between container volume in litres and weight in kilograms. The sum of the placed container volume will form the basis (theoretical container volume), independent of the 'filling degree'. This means, for example, that a 120 litre placed container will be deemed to weight 13.2 kilo ($120l \cdot 0.11 = 13.2\text{kg}$).

The actual weight will not be used. NB! Exception: 10m³ Askøy Municipality and Bjørnafjorden Municipality as well as 30m³ containers in Askøy Municipality are to be calculated in relation to weight. The road slip from the final treatment facility must be included in the invoice basis.

Paperboard and paper

Same as the above point, but the containers are used for cardboard and paper.

Additionally, final treatment must also be included in the unit prices.

Plastic

The same as the above points, but 200-250 litre plastic sacks are used as 'containers'.

Additionally, final treatment must also be included in the unit prices.

The annual scope of this service is unknown. It is assumed that collection will be made together with cardboard and paper.

II.2.5. Award criteria

Criteria below

Price

II.2.6. Estimated value

Value excluding VAT: 40 000 000,00 NOK

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Duration in months: 24

This contract is subject to renewal: yes

Description of renewals:

Option for an extension of the contract for 2+2 years, maximum 6 years. The contracting authority can choose to extend the contract multiple times, e.g., for 1 year at a time.

Each municipality will be free to extend its contract. Some municipalities can thus extend their contract, whilst others do not.

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: yes

Description of options:

See the tender documentation.

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

See the tender documentation.

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Registered in a trade register or company register.

Tenderers must be registered in a company register or trade register in the member state where the tenderer is established. As described in annex XI of directive 2014/24/EU; tenderers from certain member countries can be required to fulfil other requirements in the mentioned annex.

Minimum requirements for qualification

Tenderers must be a legally established company. Documentation: Tenderers registered in the Norwegian Register of Business Enterprises do not need to enclose documentation. The contracting authority will control the registration by using the organisation number provided in the tenderer's Merccell profile. For tenderers that are not registered in the above-mentioned register, the tenderer must provide certificates or confirmation of registration (equivalent to a company registration certificate) in a trade register or company register as described in the legislation in the country where the tenderer is established. The certificate must not be issued more than 6 months prior to the tender deadline.

Requirement: Tenderers must have the necessary permits to collect, temporarily store and transport industrial waste for approved final treatment and to handle hazardous waste.

The supplier must document which plant will carry out the final treatment of the waste, as well as a permit for handling hazardous waste, cf. Waste Regulations §11-6 (ref. § 11-3)

III.1.2. Economic and financial standing

List and brief description of selection criteria:

Other economic and financial requirements

In regards to any other economic and financial requirements stated in the tender notice or in the procurement documents, the tenderer must verify:

Minimum level(s) of standards possibly required:

Minimum requirements for qualification

Tenderers must have sufficient economic and financial capacity to fulfil the contract. A minimum rating of "satisfactory" is required within at least two of the following criteria per Proff Forvalt: Profitability, liquidity and solvency for accounting year 2021. Documentation requirement: Askøy Municipality will obtain information on the tenderer's economic and financial capacity for 2021 from Proff Forvalt credit information company. It is therefore unnecessary to submit these details. (All companies who have submitted accounts to the Brønnøysund Register Centre will be registered through Proff Forvalt). Tenderers must see if there is such information available from Proff Forvalt (www.forvalt.no). Documentation for foreign tenderers: Tenderers must, upon request, submit a credit rating report from a company that has a licence from the Norwegian Data Protection Authority to operate a credit information company in Norway, possibly from a company with the equivalent certification in a member country of the EU/EEA. The credit rating report must be based on updated accounting information.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

Only for services

Only for services: During the reference period, the tenderer has carried out the following important goods deliveries of the requested type, or the following important services of the requested type. The contracting authority can require up to three years' experience and can take experience from the period before the last three years into consideration.

Minimum level(s) of standards possibly required:

Minimum requirements for qualification

Tenderers must have good and relevant experience from equivalent assignments. Equivalent assignments means collection, aggregation, transport and final treatment of industrial waste.

Documentation requirement: Description of up to three of the most relevant assignments during the last three years. The description must include a specification of the value of the assignment per year, number of pick-up locations, amounts, dates, and recipients (names, telephone nos. and E-mail addresses) The tenderer is responsible for documenting the assignment's relevance through the description. The attached template for project overview MUST be used, Annex 1. Only the first three reference projects will be assessed if more than three reference projects are listed.

III.2. Conditions related to the contract

III.2.2. Contract performance conditions

See the tender documentation.

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

IV.2. Administrative information

IV.2.1. Previous publication concerning this procedure

Notice number in the OJ S: [2022/S 045-118266](#)

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 26/10/2022 Local time: 12:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

Norwegian

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Duration in months: 6 (from the date stated for receipt of tender)

IV.2.7. Conditions for opening of tenders

Date: 26/10/2022 Local time: 12:00

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.3. Additional information

Changes have been made to this competition as compared to a competition that was published earlier, which was cancelled.

VI.4. Procedures for review

VI.4.1. Review body

Official name: Bergen Tingrett

Town: Bergen

Country: Norway

VI.5. Date of dispatch of this notice

23/09/2022
