---

**Section II: Object**

**II.1. Scope of the procurement**

**II.1.1. Title**

Fleet Management Software  
Reference number: 469036

**II.1.2. Main CPV code**

72268000 Software supply services

**II.1.3. Type of contract**

Services

**II.1.4. Short description**

Welthungerhilfe is one of the largest private aid organizations in Germany, without political or religious affiliation. Since Welthungerhilfe was founded in 1962 each sitting German President has been its patron. The project work is carried out in more than 30 countries on the continents of Africa, Asia and Latin America. In order to carry out the project work, Welthungerhilfe needs vehicles and other assets.

For the administration and management of these vehicles and assets a global fleet management solution is required. The solution will be used worldwide, but the Internet connection at the individual locations varies greatly in availability, throughput, latency and quality (packet loss, jitter). The overall system offered must be fault-tolerant to this type of connection fluctuations.

#### **II.1.6. Information about lots**

This contract is divided into lots: no

#### **II.1.7. Total value of the procurement**

Value excluding VAT: 88 176,00 EUR

### **II.2. Description**

#### **II.2.2. Additional CPV code(s)**

48430000 Inventory management software package, 48000000 Software package and information systems

#### **II.2.3. Place of performance**

NUTS code: DEA22 Bonn, Kreisfreie Stadt

Main site or place of performance: Bonn, GERMANY.

#### **II.2.4. Description of the procurement**

Welthungerhilfe is one of the largest private aid organizations in Germany, without political or religious affiliation. Since Welthungerhilfe was founded in 1962 each sitting German President has been its patron. Welthungerhilfe has two locations in Germany (Bonn and Berlin). The project work is carried out in more than 30 countries on the continents of Africa, Asia and Latin America. In order to carry out the project work, Welthungerhilfe needs vehicles. Vehicles are mission critical assets in WHH operations. Target scenario introduction of a global fleet management solution through the overall system described below, including the provision of operational readiness by the contractor based on a work contract, as well as the provision of the necessary system services to maintain operational readiness. This includes the homogenization of fleet administration in the different countries in order to improve the usability of the resulting data. The aim is to reduce complexity and simplify operation so that the usability increases. The goal of the project is a global, standardized fleet management that meets the main requirements of the stakeholders and allows the organization to improve efficiency and effectiveness. WHH wants to reduce administrative effort, cost for purchasing and repairs and fuel consumption. Also, WHH would like to get an overview of the global fleet cost in order to be able to introduce improvements. The entire system will be used worldwide, the Internet connection at the individual locations varies greatly. Internet connections may vary in availability, throughput, latency and quality (packet loss, jitter). The overall system offered must be fault-tolerant to this type of connection fluctuations. The design of the proposed fleet management infrastructure makes optimal use of the available resources (according to the current state of the art) and thus ensures a very good user experience.

#### **II.2.5. Award criteria**

Quality criterion - Name: Requirements / Weighting: 60

Price - Weighting: 40

#### **II.2.11. Information about options**

Options: no

#### **II.2.13.**

## Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:  
no

### II.2.14. Additional information

#### Section IV: Procedure

---

##### IV.1. Description

###### IV.1.1. Type of procedure

Competitive procedure with negotiation

###### IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

###### IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

##### IV.2. Administrative information

###### IV.2.1. Previous publication concerning this procedure

Notice number in the OJ S: [2020/S 066-157495](#)

###### IV.2.8. Information about termination of dynamic purchasing system

###### IV.2.9. Information about termination of call for competition in the form of a prior information notice

#### Section V: Award of contract

---

**Contract No:** 469036

**Title:**

Fleet Management Software

A contract/lot is awarded: yes

##### V.2. Award of contract

###### V.2.1. Date of conclusion of the contract

18/11/2020

###### V.2.2. Information about tenders

Number of tenders received: 8

Number of tenders received by electronic means: 8

The contract has been awarded to a group of economic operators: no

###### V.2.3. Name and address of the contractor

Official name: Chevin Fleet Solutions Ltd
