I.6. Main activity

Port-related activities

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Procurement of an Engineering Design Group for the Construction of a Harbour Building
Reference number: 0119

II.1.2. Main CPV code

71320000 Engineering design services

II.1.3. Type of contract

Services

II.1.4. Short description

Brønnøy Havn KF would like to have an engineering design group consisting of an architect, consultant with harbour expertise landscape architect and all consultancy professions associated with building and construction.

Due to the limited ground area for a new harbour building, it is particularly important that the engineering design group has expertise in harbours. Tenders are to be submitted as a group contract, and Brønnøy Havn KF will sign a contract with one of the companies in the group. The tender must clearly state which company is responsible for the tender and who will be the contract party with Brønnøy Havn KF. The engineering design group will carry out the draft project, preliminary project and detailed project, with engineering design follow-up for the entire execution phase for the contract work. The engineering design group will be contracted as soon as possible after the tenders have been submitted. The anticipated start for the assignment is approx. February 2019.

II.1.5. Estimated total value

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.3. Place of performance

NUTS code: NO071 Nordland

Main site or place of performance: Brønnøysund, Norway.

II.2.4. Description of the procurement

Brønnøy Havn KF would like to have an engineering design group consisting of an architect, consultant with harbour expertise landscape architect and all consultancy professions associated with building and construction.

Due to the limited ground area for a new harbour building, it is particularly important that the engineering design group has expertise in harbours. Tenders are to be submitted as a group contract, and Brønnøy Havn KF will sign a contract with one of the companies in the group. The tender must clearly state which company is responsible for the tender and who will be the contract party with Brønnøy Havn KF. The engineering design group will be contracted as soon as possible after the tenders have been submitted. The anticipated start for the assignment is approx. February 2019.

See the tender documentation for further information.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Start: 20/02/2019

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: no

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Company Registration Certificate.

Tenderers must be registered in the Register of Business Enterprises. A valid company registration certificate must be presented. The certificate must not be older than 6 months calculated from the tender deadline.

HSE declaration.

Tenderers must, at the latest by the tender deadline, present a self-declaration stating that statutory requirements within health, safety and the environment (HSE) are met. A missing HSE declaration will result in rejection of the tender.

This applies for all underlying contract relationships. A breach of the tenderer's obligation to demand a HSE declaration from his subcontractors will give the contracting authority the right to demand that the tenderer replaces the company/companies in question with sub-contractors who can present a HSE declaration.

III.1.2. Economic and financial standing

List and brief description of selection criteria:

Tax certificate

Tenderers must present a valid tax certificate. The tax certificate must not be older than 6 months from the deadline for receipt of tenders. The same applies for all underlying contractual relationships. A breach of the tenderer's obligation to demand a tax certificate from his sub-contractors will give the contracting authority the right to demand that the tenderer replaces the company/companies in question with sub-contractors who can present a tax certificate.

Credit rating:

A credit rating from a finance institution showing sufficient credit worthiness to fulfil the contract.

Insurances:

An insurance certificate for valid insurance must be presented to the builder for inspection. Such an inspection does not waive the tenderer's risk that the insurance does not have adequate cover. The insurance must cover the tenderer's responsibility in accordance with the assignment, as regulated by NS 8402 and this tender documentation.

Minimum level(s) of standards possibly required:

Tax certificate:

The insurance must cover the tenderer's responsibility in accordance with the assignment, as regulated by NS 8402 and this tender documentation.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

Central or local certification:

Documentation of relevant certification within the areas required to fulfil the contract. The documentation can also be from collaboration partners. It is a prerequisite that tenderers have the correct development class for the assignment.

Experience from comparable assignments:

Tenderers must have experience and documentation from comparable assignments. The architect must have documentation of experience with designing comparable buildings as regards the function and the consultant with harbour expertise must have documentation of experience with harbour operations and the harbour's function as an intersection for logistics.

Minimum level(s) of standards possibly required:
