2. Procedure

2.1. Procedure

Title: EPJ Legetjenesten - Målselv kommune (stage 1: Qualification)

Description: The contracting authority in this procurement is Målselv municipality, municipality number 5524.

Procedure identifier: 1ced79b3-6a01-4c8e-95cf-c982c5da2b86

Internal identifier: 2026-047

Type of procedure: Negotiated with prior publication of a call for competition / competitive with negotiation

The procedure is accelerated: no

Main features of the procedure: Needs Description - Why the system is procured: Målselv municipality, with about 6,800 inhabitants, wants to procure a new electronic patient journal system for the medical service that better supports an effective, safe and connected clinical working day. The current system landscape is characterised by many integrations towards critical national and local systems, and the medical service particularly experiences challenges connected to performance, work flow, complexity in medicine handling and interaction with other parts of the health and welfare service. The municipality particularly wants to solve challenges connected to: inertia and system instability, many clicks and little intuitive work processes, complex medicine handling, insufficient support for integrations, time consuming administration, limited flexibility for further development. The medical service has a great responsibility for correct and updated patient information, high patient safety and effective handling of clinical processes such as medicine prescription, laboratory requisition, message exchange and financial settlement. At the same time, there are ever stricter requirements for information security, privacy, availability and robustness in the systems. The municipality therefore needs a modern EPJ system that reduces risk, simplifies work processes and facilitates for future development and interaction. What type of system shall be procured: Målselv municipality shall procure a future orientated, cloud based electronic patient journal system for the medical service, which fully supports the general practitioner and municipal medical service. In order to support the medical service's work processes, it is important that the system provides functionality for: be a cloud based system with minimal local infrastructure, high performance and stability, also with comprehensive use and interaction with several integrated systems support efficient clinical work processes with good user

friendliness and appropriate work flow facilitated for secure and updated medicine handling, facilitate integration and information exchange with relevant national and local systems, including, among other things, Norsk Helsennett, Helsennorge, Core journal, DIPS, Helfo/KUHR, Patient journeys, SYSVAK, laboratory systems as well as payment and telephony systems, facilitate for secure access independent of work place support requirements for information security, access management, logging, traceability and privacy. collaboration. The municipality would like to facilitate more efficient work processes, reduced administrative work and a better information flow between systems and actors. It is desirable that the system contributes to simplifying the work day for employees and support an effective, secure and future orientated medical service. At the same time, the system ought to facilitate further development within digital interaction, automation and improvement of work processes.
