II.1.4. Short description

This contract is to provide gridded distributions of anthropogenic (global and European domains) and natural and biogenic emissions (global only) in direct support of CAMS production chains, with target resolutions of 10 to 50 km (global) and 5 to 10 km (Europe). The period covered will be from 2000 to 2021 for the global emissions, and from 2000 to 2018 for the European regional emissions. Besides the yearly totals, the contractor will deliver monthly, weekly and diurnal temporal profiles, so that variations can be accounted for in the CAMS systems. Improving the representation of the temporal variations of emissions and investigating modelling methodologies to calculate certain emissions as a function of

meteorological parameters (including forecasted ones) or of other proxies will be in scope of the developmental aspects of the work.
