I.2. Information about joint procurement

The contract involves joint procurement

I.3. Communication

The procurement documents are available for unrestricted and full direct access, free of charge, at: <https://permalink.mercell.com/186559139.aspx>

Additional information can be obtained from the abovementioned address

Tenders or requests to participate must be submitted electronically via: <https://permalink.mercell.com/186559139.aspx>

I.4. Type of the contracting authority

Regional or local authority

I.5. Main activity

General public services

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Electricity - physical delivery and financial management of electricity for Trondheim Municipality
Reference number: 2022/22777

II.1.2. Main CPV code

09300000 Electricity, heating, solar and nuclear energy

II.1.3. Type of contract

Supplies

II.1.4. Short description

Trondheim Municipality, hereafter called the contracting authority, invites tenderers to an open tender contest for a framework agreement for electricity, which includes the physical delivery of electricity to the municipality's units, optimisation of concessionary energy sales, and financial management of termin contracts.

II.1.5. Estimated total value

Value excluding VAT: 120 000 000,00 NOK

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

09310000 Electricity, 71314000 Energy and related services, 71314200 Energy-management services

II.2.3. Place of performance

NUTS code: NO060 Trøndelag

II.2.4. Description of the procurement

Based on historical figures and the current installations, the total annual consumption of electrical energy for the contracting authority and collaboration partners is approx. 130 GWh split between approx. 2,500 measuring points. The contracting authority has concessionary energy for approx. 35.7 GWh/annum, which will be included in the management.

The delivery mainly comprises the following areas:

- Physical delivery of electrical energy
- Handling and optimising concessionary energy
- Implementation of a price insurance strategy and handling financial contracts

- Overview and prognoses for price development in the spot and forward market for electricity, as well as important input factors for the production of, for example, water, wind, coal and gas.
- Invoicing services and site administration
- Consultancy services and installation of environmental and efficiency measures
- General consultancy services
- Reports

The contracting authority currently has a price insurance strategy, which states an interval for a given percentage share of the expected consumption, which is to be price insured with forward contracts. The amount of the consumption that is to be price insured is decided by an interval for the price insurance model within different time horizons. Within these intervals the contracting authority decides how much will be price insured based on the relationship between the average spot price in recent years and the price of forward contracts and judgemental assessments of the expected market development. The contracting authority would like to have the chosen tenderer as an opponent for all transactions, and they must not be a clearing customer at Nasdaq OMX.

The contracting authority can require consultancy services in the contract period that are in addition to the areas specified in this tender documentation. If the tenderer is to demand compensation for any general consultancy services that are not mentioned in the tender documentation, the frameworks for these consultancy services must be agreed in advance. It is the tenderer's responsibility to ensure that such an agreement is signed. Tenderers are asked to specify hourly rates/the fee model in their tender.

The signed contract will be based on the contracting authority having an obligation to meet their need for energy through the contract for the locations stated when the contract was signed. It is highly probable that energy deliveries to additional locations will be phased in due to new developments and any rental of premises that does not include electricity.

Subsequently, energy deliveries can also be phased out if, for example, locations are no longer used.

The procurements will cover all procurements within the product range covered by this contract and that are made by Trondheim Municipality with collaboration partners in the contract period. The contracting authority has based its specification of the services on the consumption from 2019-2021.

II.2.5. Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6. Estimated value

Value excluding VAT: 120 000 000,00 NOK

II.2.7. Duration of the contract, framework agreement or dynamic purchasing system

Start: 01/01/2023 End: 31/12/2024

This contract is subject to renewal: no

II.2.10. Information about variants

Variants will be accepted: no

II.2.11. Information about options

Options: yes

Description of options:

Option for a contract extension for 1 + 1 year on the same terms.

Option for the procurement of electricity with a guarantee of origin.

Option for consultancy services and commissioning, including procurement or leasing of equipment, for different environmental and efficiency measures.

Option for Trondheim Havn IKS to use the contract for new installations.

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no

II.2.14. Additional information

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Registration in a professional register: Tenderers must be registered in a trade register in the country where the tenderer is established. As described in annex XI of directive 2014/24/EU; tenderers from certain member countries can be required to fulfil other requirements in the mentioned annex. Minimum qualification requirements. Requirement: Tenderers must have a valid actor contract as a trade and clearing representative with Nasdaq OMX/Nord Pool for activities covered by this procurement. Documentation: Copy of an actor contract or confirmation from Nasdaq OMX/Nord Pool.

Registration in a trade register or a company register: Tenderers must be registered in a company register or a trade register in the country where the tenderer is established. As described in annex XI of directive 2014/24/EU; tenderers from certain member countries can be required to fulfil other requirements in the mentioned annex. Minimum qualification requirements. Requirement: Tenderers must be a legally established company.

Documentation: Norwegian tenderers must present their company registration certificate.

Foreign companies: Registration certificates in professional registers as determined by legislation in the country where the tenderer is established.

III.1.2. Economic and financial standing

List and brief description of selection criteria:

Other economic and financial requirements: As regards any other economic and financial requirements that have been stated in the notice or in the procurement documents, the tenderer states that: Minimum qualification requirements: Requirement: Tenderers must have the required economic and financial capacity to fulfil the contract. Creditworthiness against a guarantee will not be accepted. Documentation: Credit assessment of the tenderer, not older than six months calculated from the deadline for receipt of tenders. The evaluation will be based on the last known fiscal figures with an indication of how the credit rating has developed during the last three years. The assessment must be carried out by a company with a credit information concession from the Norwegian Data Protection Authority, see <https://www.datatilsynet.no/personvern-pa-ulike-omrader/kundehandtering-handel-og-medlemskap/kredittvurdering/>. The result of the credit rating must be given as a graded value (letters or numbers) on a defined scale.

Minimum level(s) of standards possibly required:

Requirement: Tenderers must be credit worthy.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

Only for public goods deliveries: The tenderer has, in the reference period, carried out the following important goods deliveries of the requested type, or the following important services of the requested type. The contracting authority can require up to three years' experience and can take experience from the period before the last three years into consideration. Minimum qualification requirement: Requirement: Experience is required from equivalent assignments. Documentation: An overview of equivalent relevant assignments from the last three years, including information on the delivery's value, size of the assignment (in GWh), date, as well as the name of the recipient of the services.

Technical personnel or technical units: The tenderer can use the following technical personnel or technical units, particularly those who are responsible for quality assurance: Separate ESPD forms must be completed for technical personnel or technical units that do not directly belong to the tenderer's company, but is capacity that the tenderer will rely on, cf. part II, section C. Minimum qualification requirement: Requirement: Tenderers must have a level of staffing that the contracting authority considers satisfactory, this applies to both scope and qualifications. This particularly applies within key areas such as commercial and daily follow-up of customers, site administration, management of concessionary energy, analyses and prognoses, and financial management of termin contracts. Documentation: An overview of the offered staff for this assignment, including CVs for key personnel.

Environmental management measures: Tenderers can use the following environmental management measures for the implementation of the contract: Minimum qualification requirements:

Requirement: Tenderers must use environmental management measures when executing the contract. Documentation: Tenderers must describe their environmental status and environmental management measures for the execution of the contract. The attached form for environmental requirements will be accepted as documentation.

Certificates issued by independent bodies for quality assurance standards. Can tenderers present certificates issued by independent bodies as documentation that the tenderer fulfils the specified quality assurance standards, including the requirement for universal design? Minimum qualification requirement: Requirement: Tenderers must have a quality assurance system. Documentation: Certificate for the company's quality assurance system issued by independent bodies that certify that the tenderer fulfils certain quality assurance standards, for example ISO 9001:2008. The Contracting Authority will also accept other documentation which shows that the tenderer has an equivalent quality assurance system. As a minimum, a general description of the system's content, including an overview of inspection plans and check-lists that are relevant for this contract, must be submitted.

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement

Framework agreement with a single operator

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

IV.2. Administrative information

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 24/11/2022 Local time: 12:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

Norwegian

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Duration in months: 3 (from the date stated for receipt of tender)

IV.2.7. Conditions for opening of tenders

Date: 24/11/2022 Local time: 12:00

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.3. Additional information

VI.4. Procedures for review

VI.4.1. Review body

Official name: Sør -Trøndelag tingrett

Postal address: Postboks 2317, Torgarden

Town: TRONDHEIM

Postal code: 7004

Country: Norway

VI.5. Date of dispatch of this notice

21/10/2022
