5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: Enrolment in a trade register

Description of selection criterion: The tenderer shall be a legally established company.

Documentation requirements: Norwegian companies: Company Registration Certificate.

Foreign companies: Proof that the company is registered in a trade or business register as prescribed by the law of the country where the company is established.

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers shall have good economic and financial capacity to be able to fulfil the contract. Documentation requirements: The company's last Annual Financial Statements including notes, the Board's Annual Report and Audit Report, as well as new information of relevance to the company's fiscal numbers. The contracting authority reserves the right to obtain credit appraisal on its own initiative. If a tenderer has a justifiable reason (e.g. newly started company) of not submitting the documentation that the Contracting Authority has required, he can document his economic and financial capacity with any other document that the Contracting Authority deems suitable.

Criterion: Environmental management measures

Description of selection criterion: Tenderers are required to have implemented environmental management measures that ensure that the tenderer is suitable to fulfil the contract's environmental provisions (see contract point 11). This means that the tenderer has methods for working actively and systematically to reduce negative environmental impact from activities connected to the execution of this contract. Documentation requirements: A description of the tenderer's environmental management measures. If a tenderer has certificates from independent bodies that document the environmental management system, they can be presented as documentation. Refer to the EU Scheme for Environmental Management and Environmental Audit (EMAS), other recognised environmental management systems in regulation (EF) no. 1221/2009 article 45, or equivalent, and other environmental management standards based on relevant European or international standards from accredited bodies such as ISO 14001 or equivalent.

Criterion: Measures for ensuring quality

Description of selection criterion: Tenderers shall have a relevant quality assurance system for the content of the contract. Documentation requirements: A description of the tenderer's quality assurance methods. Alternatively: Certificate for the company's quality assurance system issued by independent bodies that confirms the tenderer fulfils certain quality assurance standards, for example ISO 9001:2015.

Criterion: Supply chain management

Description of selection criterion: Tenderers shall be suitable for fulfilment of contractual requirements for due diligence assessments for responsible businesses (see contract point 12). This means that the Tenderer has implemented measures and systems that are used in the Tenderer's work to safeguard basic human rights and decent working conditions, as well as to prevent environmental degradation and corruption. Documentation requirements: A description of the tenderer's systems for working with due diligence assessments in accordance with the UN's guiding principles for business and human rights (UNGP) and OECD's guidelines for multinational companies. The documentation shall include: Formal policy/guidelines that cover an obligation to comply with the requirements of responsible business.

Criterion: References on specified deliveries

Description of selection criterion: Tenderers shall have experience with the construction of crew vehicles/fire engines for fire and rescue. Documentation requirements: Description of two deliveries of crew vehicles/fire engines carried out during the last three years. The names of the contracting authorities, the contract's value, delivery date and a description of the assignment's content are given for each delivery.

Description: Environment The procurement is for special vehicles for fire and rescuing services. Regulations on emission requirements for public procurement of vehicles for road transport (FOR-2022-12-20-2384) § 2 exempt such vehicles from the regulations. In addition, the Procurement Act § 5 b opens a third paragraph that the obligation to set climate and environmental requirements does not apply "if the procurement is of its nature has an immaterial climate footprint and an environmental impact". For turn-out vehicles, the environmental impact must be assessed based on the vehicle's particular area of use. The vehicles are always required to deliver full performance in extreme operating conditions, regardless of temperature, load and available infrastructure. There are currently no zero emission alternatives that fulfil all the technical and operative requirements. Emphasising climate and environmental considerations with a minimum of 30% as the award criterion will therefore not have a real effect on climate and the environment, and can, in the worst case, weaken society's preparedness, cf. § 5 b third paragraph, first period. Based on this, the environmental requirements in accordance with the Public Procurement Act § 5 b, are assessed as not applicable for this procurement, cf. § 5b third paragraph.
