II.2.3. Place of performance

NUTS code: NO061 Sør-Trøndelag

II.2.4. Description of the procurement

There are approx. 90 000 households in Trondheim municipality, each with their own collection schemes. Of these, approx. 60 000 own small containers outside the house, while the rest are distributed at common collection points such as containers and waste suction systems. The route optimisation tool should be used on the devices connected to small containers and larger ones. This amounts to approx. 130 000 units located in the city, distributed in approx. 34 000 collection locations. Based on the type of device and vehicles that can collect the unit, we want a scheme that generates new efficient routes for an expanding city.
