II.2.14. Additional information

Section III: Legal, economic, financial and technical information

III.1. Conditions for participation

III.1.1. Suitability to pursue the professional activity, including requirements relating to enrolment on professional or trade registers

List and brief description of conditions:

Requirement: Tenderers must be a legally established company.

Documentation requirement:

- Norwegian companies: Company registration certificate.
- Foreign companies: Documentation that the tenderer is registered in a company register, professional register or a trade register in the country where the tenderer is established.

III.1.2. Economic and financial standing

List and brief description of selection criteria:

Requirement: Tenderers must be credit worthy.

Documentation requirement: A credit assessment of the tenderer, not older than 6 months from the deadline for receipt of tenders. The result of the credit rating must be given as a graded value (letters or numbers) on a defined scale. Tenderers must not have a score lower than credit score A.

If a tenderer, in order to comply with the requirement, presents guarantees from other companies (e.g. the parent company), an equivalent credit rating must be submitted for that company. Furthermore, a legally binding confirmation must be enclosed from this company stating that they have joint and several liability under the contract.

Minimum level(s) of standards possibly required:

Tenderers must have all matters in relation to government tax authorities in order.

Documentation requirement:

Norwegian companies: VAT and tax certificate. The tax certificate must not be older than six (6) months, calculated from the tender deadline.

The certificate can be ordered via www.altinn.no.

Foreign companies: A certificate issued by the relevant authority in the tenderer's home country, confirming that the tenderer has fulfilled their obligations relating to the payment of taxes and duties in accordance with the legislation of the country where the tenderer is established.

III.1.3. Technical and professional ability

List and brief description of selection criteria:

Requirement: The contractor (as a company) must have experience with both excavating ditches, filling, levelling, and compressing.

Documentation: A list of up to five (5) and not less than three (3) contracts that the tenderer has completed or is carrying out in the last five (5) years, calculated from the tender deadline. Tenderers must also submit a certificate from relevant reference customers of satisfactory execution of the most important work. The following will be accepted as 'written attestation'; a reference letter, signed hand-over protocols, and emails from the relevant person at the contracting authority in question, e.g., responsible project manager, general manager, department manager, etc.

Note however: Regardless of which form the attestation has, the attestation document must clearly include:

- name of the contracting authority;
- description of what the contract work involved;
- whether there were several suppliers and/or sub-suppliers involved in the assignment, and how the work was distributed between them;
- the date the work was carried out;
- the contract value;
- the customer's assessment of the execution of the most important contract work.

Each and every reference assignment is not required to have involved ditch excavation, filling, levelling, and compressing, as long as in total (if you look at the reference assignments as one) it is clear that the tenderer has the requested experience.

Tenderers have the responsibility and risk that the attestations have a form and content that is in line with the qualification and documentation requirements. Tenderers carry the risk for uncertainties in the attestations.

If a tenderer has valid central certification from the Directorate for Building Quality within the function 'executing', within 'road and ground work' in development class 1, the certificate will be accepted as documentation that the qualification requirement is met.

Minimum level(s) of standards possibly required:

Competence and systems are required that ensure that the site work and other services covered by the framework agreements can be provided with low environmental impact and a high degree of security.

Documentation requirement:

Documentation of environmental impact: Submit a description of the company's routines and systems to secure a low environmental impact when carrying out assignments under the contract. If a company has environmental certification or ISO 14001:2004 (or a more recent version), EMAS, Eco-Lighthouse or equivalent 3rd party verified systems, such a certificate will be accepted as documentation for fulfilment of the qualification requirement.

Documentation of quality assurance: Submit a description of the company's routines for quality assurance that will be used for the execution of the contract. If a company is certificate in accordance with ISO 9001 for equivalent third party verified systems, such a certificate will be accepted as documentation for fulfilment of the qualification requirement.

Section IV: Procedure

IV.1. Description

IV.1.1. Type of procedure

Open procedure

IV.1.3. Information about a framework agreement or a dynamic purchasing system

The procurement involves the establishment of a framework agreement
Framework agreement with several operators Envisaged maximum number of participants to the framework agreement: 42

IV.1.8. Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: no

IV.2. Administrative information

IV.2.2. Time limit for receipt of tenders or requests to participate

Date: 13/01/2023 Local time: 12:00

IV.2.3. Estimated date of dispatch of invitations to tender or to participate to selected candidates

IV.2.4. Languages in which tenders or requests to participate may be submitted

Norwegian

IV.2.6. Minimum time frame during which the tenderer must maintain the tender

Tender must be valid until: 31/03/2023

IV.2.7. Conditions for opening of tenders

Date: 13/01/2023 Local time: 12:00

Section VI: Complementary information

VI.1. Information about recurrence

This is a recurrent procurement: no

VI.3. Additional information

Addition information on the calculation of the procurement's value: The lowest value is estimated to be NOK 140,000,000, the highest value NOK 196,000,000, and the probable value NOK 150,000,000.

VI.4. Procedures for review

VI.4.1. Review body

Official name: Haugaland tingrett

Town: Haugesund

Country: Norway

VI.5. Date of dispatch of this notice

27/10/2022
