Award criterion number: 70

Criterion:

Type: Quality

Name: Environment

Description: The procurement of consultancy services is seen as a procurement that, in its nature, has a climate footprint and an environmental impact that is immaterial. This procurement does not include extensive travel activities. Consultancy services can be implemented digitally, with only an estimate that a small number of the meetings will be carried out physically. The procurement concerns consultancy services and is considered by DFØ as a service with immaterial climate footprint. In this procurement, the award criteria for environment is not weighted by 30%. The background for this is the exclusion provisions in the Public Procurement Regulations §7-9 fifth paragraph. (5) The obligation to make requirements or criteria according to this provision does not apply as the procurement in accordance with its nature (service procurement) has a climate footprint and an environmental impact that is immaterial. The system's nature is also not sufficiently defined to be able to define appropriate award criteria for this at the time of publication • The procurement concerns consultancy services and is considered by DFØL as a service with immaterial climate footprint.
