Services

1. Buyer

1.1. Buyer

Official name: Bergen Havn

Email: bergen.havn@bergenhavn.no

Legal type of the buyer: Public undertaking, controlled by a local authority

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: Framework agreement for winter maintenance in limited port areas.

Description: Background The Port of Bergen needs to establish a new framework agreement for winter maintenance in a limited port area. Winter preparedness is necessary to ensure safe access and safe operation in the port area throughout the winter season. The area includes traffic and operational critical areas where weather and driving conditions can change quickly, and where measures can be implemented at short notice. The procurement shall facilitate clear interaction, effective handling of events connected to snow and ice, as well as ongoing coordination between the parties. Description of the assignment The assignment is for the provision of winter maintenance services in a limited area under the Bergen Port's area of responsibility. The service shall support safe and appropriate accessibility in the winter season and it will be controlled through a zone/route division with the accompanying level of execution, cf. annex 1a. Tenderers are expected to be able to clear several areas simultaneously as needed under heavy precipitation conditions. The delivery mainly includes snow clearing, snow shovelling and measures against slippery lead, including salting and/or gritting. If needed, the tenderer shall also be able to handle the removal of snow when local storage possibilities are inadequate. The assignment includes winter stand-by with a duty scheme and an option for emergency responses to events, so that the necessary measures can be carried out in connection with varying weather and driving conditions. The framework agreement shall support efficient interaction between the parties, including notification, ongoing coordination, simple documentation and reporting connected to completed assignments as a basis for follow-up and control. The Port of Bergen would like a pro-active supplier.

Procedure identifier: 67c49f22-605e-4b56-8ad1-d7b3a9e8e2f1

Internal identifier: cmlv3uj3j000004l2dvvimfo2

Type of procedure: Open

The procedure is accelerated: no

Main features of the procedure: Used when the contracting authority would like to be able to negotiate the content of the tenders. Tenderers are prequalified and negotiations can be made

before the final tender offer is submitted. Tenderers are strongly encouraged to follow the instructions given in this tender documentation with annexes and possibly ask questions about uncertainties in the communication module in Hyyr.
