II.2. Description

II.2.2. Additional CPV code(s)

33190000 Miscellaneous medical devices and products, 33196000 Medical aids, 33196100 Devices for the elderly, 33196200 Devices for the disabled, 35120000 Surveillance and security systems and devices, 35125100 Sensors, 48180000 Medical software package, 48814000 Medical information systems, 48814400 Clinical information system, 48814500 Casemix system, 85140000 Miscellaneous health services

II.2.3. Place of performance

NUTS code: NO011 Oslo

NUTS code: NO Norge

II.2.4. Description of the procurement

The welfare technology commitment in Oslo Municipality has an overall aim of increasing safety, coping abilities and activity for patients. In recent years, entities in Oslo Municipality has seen a need for alternative ways to follow-up patients with chronic illnesses, mental disorders, and cancer. There is a need to raise the quality and increase the efficiency involved in the follow-up of these user groups. Oslo Municipality would therefore like to establish a framework agreement for technology connected to distance follow-up.

The Directorate of Health is managing a national testing of distance follow-up with the participation of six municipalities. Selected districts in Oslo Municipality have tested distance follow-up with good results. Based on this, Oslo Municipality would like to increase the use of distance follow-up and is, therefore, establishing a framework agreement that all entities in the municipality can make call-offs on.

The distance follow-up intends to:

- create increased safety, independence, coping abilities, and life quality for patients;
- create increased service capacity for the future.

The technology for distance follow-up can, for example, be; sensors or other medical measuring instruments that actively or passively measure vital/physiological values, applications for documentation, follow-up, administration, etc.

Oslo Municipality has currently defined 8 main functions that we would like the system to cover:

- A. Function for digital self-measuring and documentation of the measurements (values and self-reporting).
- B. Function that shows the development of the patient's health condition over time ('learning').
- C. Function that warns of changes in the patient's health condition ('reaction').
- D. Function that contributes to increased self-mastering and an increased ability to implement their own measures.
- E Function that reminds the patient to take measurements and notify if they are not done.
- E. Function that enables persons outside Oslo Municipality to see the patient's measurements.
- G. Function that enables two-way communication with the patient without being physically present.

II.2.5. Award criteria

Quality criterion - Name: Degree that the needs are covered and goal achievement (functionality). / Weighting: 44

Quality criterion - Name: User friendliness. / Weighting: 28

Quality criterion - Name: Implementation ability / Weighting: 8

Price - Weighting: 20

II.2.11. Information about options

Options: yes

Description of options:

The options are described in the contest documents.

II.2.13. Information about European Union funds

The procurement is related to a project and/or programme financed by European Union funds:
no
