For lot 1, which includes filling fuel from a pump, the municipality wants the opportunity to fill fuel at a self-service pumping station. There is a need for a certain distribution of the offered pumping stations so that different departments in the municipality can fill at different locations, and where this is closest to the daily service production. The number of filling stations / pumps in central areas of Rana will therefore give a positive effect until further delimitation that does not add further added value to the municipality. Rana municipality needs at least 1 of the pumps to be centrally located, which in this case means no more than 4 km from Mo in the centre of Rana.
