**Criterion:**
Type: Quality
Name: Climate and environment
Description: Cf. the Public Procurement Regulations § 7-9 Climate and environmental considerations in public procurements, the requirements and criteria shall aim at reducing the procurement´s total climate footprint or environmental impact. In this procurement, it is the contracting authority´s assessment that the goal is achieved best by setting requirements for the tenderer´s qualifications and minimum requirements for the delivery´s performance. Tenderers must have an environmental management system. The requirement for the tractor´s environmental properties gives itself, as all newer tractors shall fulfil the last emission standard for this type of machinery. In this case it is step 5 motor that applies. Therefore we do not envisage that there is a basis for achieving better environmental qualities by evaluating the environment.
