#### **II.2.3. Place of performance**

NUTS code: NO071 Nordland

#### **II.2.4. Description of the procurement**

The contracting authority intends to enter into a framework agreement with a tenderer for independent inspections in accordance with the rules given in the Planning and Building Act and accompanying regulations.

The tenderer will assist the municipalities with the implementation of relevant projects in the framework agreement period.

The projects will be both investment and maintenance projects. The tenderer will normally be contracted early in a project, preferably in the initiation phase, in order to follow the project through all the phases in the project, from the start-up to completion and the guarantee follow-up. The number and scope of the assignments in the framework agreement period will depend on approved investment budgets. The budgets always depend on the annual grants and can, thus, vary from year to year in the framework agreement period.

The contracting authority primarily needs a tenderer that can implement independent inspections of the engineering design and execution for the following inspection areas:

Building physics, structure safety, geotechnics, and fire safety. The framework agreement will

also be usable for inspection assignments beyond the regulatory requirements, where required by the building authorities. The prospective need will be clarified and described in each individual call-off.

For further information about the procurement, see the tender documentation.
