2.1.4. General information

Additional information: Please note that the exclusion grounds are not applied by Ørsted Group. This notice supplements previously published notices from Achilles Information A/S regarding the entities mentioned in section 1 and 2.1.4's use of the qualification system. Ørsted Group means any legal entity(s) which is directly or indirectly controlling, controlled or under common control with Ørsted A/S, control meaning the power to direct the management of such a legal entity (directly or indirectly), alone or jointly, whether through ownership of securities, by contract or otherwise and shall be presumed to exist in relation to a controlled legal entity when another legal entity holds (i) a majority of the voting rights at general meetings or an equivalent governance forum, (ii) the right to control a majority of the voting

rights by virtue of an agreement, (iii) the right to direct the financial and operational management by virtue of articles of association or agreement, (iv) the right to appoint or remove the majority of the members of the management board, supervisory board or equivalent bodies. For avoidance of doubt this therefore also includes companies, where a wholly owned subsidiary of Ørsted A/S owns 50% of the shares in a company and jointly control this company for instance through a shareholders agreement. Notwithstanding the foregoing, Ørsted Group shall exclude (a) the Danish government and any member or instrumentality thereof; and (b) any company controlled by the Danish government or by any member or instrumentality thereof other than Ørsted A/S and the legal entities that Ørsted A/S directly or indirectly controls. The Ørsted Group establish new legal entities on an ongoing basis. Any new legal entities will also become a Contracting Entity, as long as the new legal entity's activities are within the usual activities of Ørsted Group which are to develop, construct and operate offshore and onshore wind farms, solar farms, energy storage facilities, and bioenergy plants, and provides energy products to its customers. New legal entities that fulfil the definition above will also be contracting entities. The Ørsted Group, which includes the entities mentioned in Section 1 as well as 2.1.4, will not be using electronic auctions, unless explicitly stated in the tender material for the specific tender. The contracting entities mentioned in Section 1 and 2.1.4 might use the procedure described in the Utilities Directive Article 50(f) which prescribes that new construction works consisting in the repetition of similar works assigned to the contractor to which the contracting entity awarded an earlier contract, can be awarded without a call for competition, provided that such works conform to a basic project for which a first contract was awarded. This right can be used by the contracting entity up to 3 times for three years after signing of the first contract. The conditions for awarding possible additional works are the following: a) The performance will be subject to the same contractual terms as the original scope of construction works with the necessary amendments following from the different timing and geographic location of the project; b) The contractor must comply with mandatory statutory law in the country where the works are to be performed; c) Minor necessary adjustments of technical specifications due to site specific matters; d) Amendment of time schedule to reflect the project for which the repetition of similar construction works is applied. The qualification system can be used by the entities mentioned in this notice as well as all other entities within Ørsted Group. The entities can procure jointly or standalone by using the qualification system. It will be stipulated in the tender material for the specific tender which entities are procuring and if it is joint procurement or standalone procurement.
