The nature of this public contract is such that national or regional economic operators do not have equal access to the requirements linked to the use of the Belgian federal "e-Procurement" platform. The technical characteristics can therefore be discriminatory and can restrict the access of

economic operators to the procurement procedure, in particular, in terms of speed and quality of the internet connection, as well as the quality of the electricity transport network. In addition, the particular forms provided by this platform from the point of view of electronic signature are not yet compatible with the ICT generally used.
