Denmark, Norway and Iceland have entered into cooperation regarding the procurement of pharmaceuticals. The countries will jointly procure and award framework agreements in order to ensure the supply of pharmaceuticals to the public hospitals and health authorities in the countries. In Denmark certain pharmaceuticals are resold to the Faroe Island and Greenland. The obligation to deliver the pharmaceuticals in Iceland is subject to the precondition that the supplier obtains an exemption regarding printed labels and leaflets. If the supplier does not obtain such exemption the agreement will only apply to Denmark and Norway, see the Framework agreement section 2.2.1 and Appendix 6.

VI.3. Additional information

This call for tenders is conducted as an open procedure in accordance with the Danish Procurement Act (udbudsloven). The procurement procedure is subject to Danish law and any complaints of the procurement procedure shall be lodged with the Danish Complaints Board for Public Procurement (Klagenævnet for udbud), see section VI.4.3.

In relation to section II.2.4, it should be noted, that the Contracting Authorities have considered whether the procurement group could be further subdivided. The Contracting Authorities have deemed that this is not the case based on the considerations of economies of scale, which will not be realizable with a further subdivision as well as costs and patient safety considerations related to the subsequent management of contract- and pharmaceuticals.

In relation to sections II.1.5 and II.2.6 it should be noted that the estimated value indicated in section II.1.5 is the total estimated value of all procurement numbers (lots) for the duration of the framework agreement, including the option of renewal, see section II.2.7. Section II.2.6 sets out the estimated value for each procurement number, including the option of renewal, see section II.2.7. The value is based on the AIP ("Apotekernes Indkøbspris" published by the Danish Medicines Agency) of the pharmaceuticals. It should furthermore be noted that the estimated value is based on historic consumption data and that the actual purchase under a framework agreement may deviate significantly from the estimate, see section II.2.4, paragraph 5.6 of the tender specifications and clause 4.2 of the framework agreement.

Questions concerning the tender documents must be submitted through the tendering system, see the provisions of the tender specifications in this regard.

The access to submit tender requires that the operator is registered as a user of Amgros' tendering system. The registration as a user may take a few days, and the tenderer must therefore make sure to register in good time. Reference is made to the information provided in the tendering system, including the user guide.

In relation to section VI.2 it should be noted that electronic invoicing is required.

Not later than at the time of lodging a complaint with the Danish Complaints Board for Public Procurement, the complainant must notify the contracting authorities in writing that a complaint has been lodged with the Danish Complaints Board for Public Procurement and whether the complaint was lodged during the standstill period, see section 6(4) of the Act.
