### **II.2.4. Description of the procurement**

The procurement has been announced as a tender contest where framework agreements will be signed per professional field (sub-contracts).

When a contest is set up in Merccell where sub-contracts will be signed, it is technically set up so that sub-contests must be held. Helfo has not organised this procurement as separate sub-contests, although several framework agreements will be signed (sub-contracts). The reason for this is mainly Helfo's need to be able to look at tenderers' total treatment offers. Therefore one sub-contest has been established (this, contest framework agreement), which makes up the entire contest in the procurement.

The objective of the tender contest is to enter into a framework agreement for the procurement of somatic specialist health services for respite patients. The framework agreements that are signed will be national, i.e., patients will be sent under the framework agreements from all of the country.

The call for tenders is split into 27 professional fields. Helfo would like to give tenderers the opportunity to submit a tender for one or several professional field.
