2.1. Procedure

Title: Enterprise risk management system

Description: Enterprise Risk Management is Statnett's framework for risk management at the strategic and tactical levels. Enterprise Risk Management is intended to provide management with an overview of risks that may affect the achievement of objectives and significant decision-making, enabling such risks to be addressed through prioritization, governance measures, and follow-up activities. In this context, operational risk management is not part of the primary focus of Enterprise Risk Management. Statnett intends to procure a new technical solution for Enterprise Risk Management. The agreement covers the ongoing provision of Software-as-a-Service (SaaS) solutions delivered over the Internet, in accordance with the requirements specified in the attached requirements specification, as well as related implementation services, integrations, data migration, training, administration, maintenance, and further development of the solution in response to changing needs, regulatory requirements, and evolving ways of working. The procurement also includes an option for a Goal and Performance Management module. Further information and requirements relating to the services covered by the contract will be provided in SSA-L Appendix 1.
