I.6. Main activity

Electricity

Section II: Object

II.1. Scope of the procurement

II.1.1. Title

Framework Agreement Soil Investigation - Offshore

II.1.2. Main CPV code

76320000 Offshore drilling services

II.1.3. Type of contract

Services

II.1.4. Short description

On the basis of legal foundations, TenneT has had the mandate to establish and operate the grid connection for offshore wind farms in its transmission grid area in Germany since December 2016.

To ensure this mandate and security of supply, TenneT builds and operates offshore converter stations in the German Bight of the North Sea.

Due to the political and social consensus for an accelerated expansion of offshore wind energy use, numerous new offshore converter substations will have to be built in the future. In the course of tendering and planning the HVDC platforms, information about the subsoil are required as a basis for planning. For this purpose, geophysical and geotechnical subsoil investigations (in short: INVESTIGATION) must be carried out.

II.1.5. Estimated total value

Value excluding VAT: 38 000 000,00 EUR

II.1.6. Information about lots

This contract is divided into lots: no

II.2. Description

II.2.2. Additional CPV code(s)

71351920 Oceanography and hydrology services, 71352000 Subsurface surveying services, 71352110 Seismographic surveying services, 71353100 Hydrographic surveying services, 43131200 Offshore drilling unit, 76320000 Offshore drilling services, 76520000 Offshore services, 76521000 Offshore installation services

II.2.3. Place of performance

NUTS code: DE Deutschland

II.2.4. Description of the procurement

On the basis of legal foundations, TenneT has had the mandate to establish and operate the grid connection for offshore wind farms in its transmission grid area in Germany since December 2016.

To ensure this mandate and security of supply, TenneT builds and operates offshore converter stations in the German Bight of the North Sea.

Due to the political and social consensus for an accelerated expansion of offshore wind energy use, numerous new offshore converter substations will have to be built in the future. In the course of tendering and planning the HVDC platforms, information about the subsoil are required as a basis for planning. For this purpose, geophysical and geotechnical subsoil investigations (in short: INVESTIGATION) must be carried out.

Official name: Regierung von Mittelfranken – Vergabekammer Nordbayern

Town: Ansbach

Country: Germany

VI.4.3. Review procedure

Precise information on deadline(s) for review procedures:

Candidates/tenderers must complain about violations of public procurement provisions in compliance with the provisions of Section 160 (3) of the ARC (Act against Restraints of Competition). An application for review is inadmissible pursuant to Section 160 (3) ARC insofar as

1. the applicant became aware of the claimed violation of public procurement provisions before filing the application for review, but did not notify the contracting authority within a time limit of

10 calendar days; the expiry of the time limit pursuant to Section 134 (2) ARC remains unaffected,

2. violations of public procurement provisions which become apparent from the tender notice are not notified to the contracting authority by the end of the time limit for the application or the submission of a tender specified in the notice,

3. violations of public procurement provisions which only become apparent from the procurement documents are not notified to the contracting authority by the end of the time limit for the application or the submission of a tender specified in the notice,

4. more than 15 calendar days have expired since receipt of notification from the contracting entity that it is unwilling to redress the objection.

VI.4.4. Service from which information about the review procedure may be obtained
