Norway – Systems and technical consultancy services – Procurement of consultancy services for nuclear security, including handling used fuel, radiation protection and risk assessment.

OJ S 194/2026 07/10/2026

Contract or concession notice – standard regime

Services

1. Buyer

1.1. Buyer

Official name: Direktoratet for strålevern og atomsikkerhet

Email: dsa@dsa.no

Legal type of the buyer: Body governed by public law, controlled by a central government authority

Activity of the contracting authority: Health

2. Procedure

2.1. Procedure

Title: Procurement of consultancy services for nuclear security, including handling used fuel, radiation protection and risk assessment.

Description: The consultant agreement shall cover the provision of technical services in support of DSA's core functions within regulatory work. The work shall include reviewing and assessing technical documentation and support for DSA in connection with inspections. There are three nuclear plants in Norway: the research reactor facilities in Kjeller and Halden, and the combined landfill and storage facility for low and medium radioactive waste in Himdalen. In 2018 the Norwegian government established a new government organisation, Norsk Nukleærdekkommisjonering (NND), which will take over all Norwegian nuclear power plants in Kjeller, Halden and Himdalen from the original operator, Institute for Energy Engineering (IFE). NND will be responsible for the operation of the nuclear installations, the production of them and the handling of radioactive waste and used core fuel. So far the nuclear power plant in Halden has been transferred from IFE to NND, and the other two installations are close to being transferred. Before the shutdown can start, there are a number of processes that must be completed so that the operator(s) shall be able to make changes in the installations in a safe and responsible manner, and for the regulation authority (DSA) to be able to approve changes in accordance with regulations and international standards. In preparation for the liquidation and during the shutdown, there will be a need to establish a new waste handling facility, including plans for a US-developed mobile melt consolidation facility (MMC). The procurement is covered by the Security Act and reflected in the contracting authority's requirement specifications and security requirements. Tenderers who would like to offer in this procurement are asked separately to familiarise themselves with the stated guidelines, prerequisites and requirements.

Procedure identifier: 7b51dd0e-8e66-4191-bed3-6b832ad1e2b9

Internal identifier: 26/03134

Type of procedure: Open

The procedure is accelerated: no

Main features of the procedure: The consultant agreement shall cover the provision of technical services in support of DSA's core functions within regulatory work. The work shall

include reviewing and assessing technical documentation and support for DSA in connection with inspections. There are three nuclear plants in Norway: the research reactor facilities in Kjeller and Halden, and the combined landfill and storage facility for low and medium radioactive waste in Himdalen. In 2018 the Norwegian government established a new government organisation, Norsk Nukleærdekkommisjonering (NND), which will take over all Norwegian nuclear power plants in Kjeller, Halden and Himdalen from the original operator, Institute for Energy Engineering (IFE). NND will be responsible for the operation of the nuclear installations, the production of them and the handling of radioactive waste and used core fuel. So far the nuclear power plant in Halden has been transferred from IFE to NND, and the other two installations are close to being transferred. Before the shutdown can start, there are a number of processes that must be completed so that the operator(s) shall be able to make changes in the installations in a safe and responsible manner, and for the regulation authority (DSA) to be able to approve changes in accordance with regulations and international standards. In preparation for the liquidation and during the shutdown, there will be a need to establish a new waste handling facility, including plans for a US-developed mobile melt consolidation facility (MMC). The procurement is covered by the Security Act and reflected in the contracting authority's requirement specifications and security requirements. Internal identifier: 26/03134

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 72220000 Systems and technical consultancy services

Additional classification (cpv): 09340000 Nuclear fuels, 42151000 Nuclear reactors, 45251110 Nuclear-power station construction work, 90521000 Radioactive waste treatment services, 90711100 Risk or hazard assessment other than for construction, 90721600 Radiation protection services, 98113000 Services furnished by specialist organisations, 98113100 Nuclear safety services

5.1.2. Place of performance

Country subdivision (NUTS): Oslo (NO081)

Country: Norway

5.1.3. Estimated duration

Duration: 36 Months

5.1.4. Renewal

Maximum renewals: 3

Other information about renewals: Up to 3 years, one year at a time (1+1+1).

5.1.5. Value

Estimated value excluding VAT: 30 000 000,00 NOK

5.1.6. General information

Reserved participation:

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.9. Selection criteria

Sources of selection criteria: European Single Procurement Document Request, Procurement Document

5.1.10. Award criteria

Criterion:

Type: Quality

Name: Quality

Description: 1) The Consulting Team's (including the Team Leads) overall competence and experience 2) Solution description for the described Scope, including: • understanding the task, • proposed plan, • cost breakdown and • resource allocation

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 80

Criterion:

Type: Price

Name: Price

Description: 1) Offered hourly rate for ongoing assignments as defined in 1.2 – Scope of work
The pricing of the consultancy levels is weighted as follows in the evaluation: • Expert, weight: 75% • Senior weight: 15% • Junior, weight: 10%

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 20
