Contract or concession notice – standard regime

Services

1. Buyer

1.1. Buyer

Official name: Innherred Renovasjon IKS

Email: tor.kristian@innkjopskontoret.no

Legal type of the buyer: Public undertaking

Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: Transport services, framework agreement

Description: The competition is for three sub-contracts for framework agreements for transport services. The transports involve transporting waste from recycling stations (sub-contract 1), delivery of glass and metal packaging (sub-contract 2) and transporting bulky/large waste (sub-contract 3). Participants in the procurement: Innherred Renovasjon is an intermunicipal sanitation company with its main office in Levanger. We are responsible for the collection and treatment of household waste and sludge in our 9 owner municipalities in Trøndelag: Inderøy, Verdal, Levanger, Frosta, Stjørdal, Meråker, Malvik, Selbu and Tydal. The estimated value per annum and the maximum value for the entire contract period per sub-contract, including any options and the expected price rise are stated in point 1.1.4. The need is uncertain. The volume can vary both up and down and the contract period will depend on, among other things, the contracting authority's needs, activities, budgetary situations and other framework factors. See the procurement documents for further information. The contract is subject to cancellation of the competition, i.e. in connection with budgetary coverage and the board's approval. The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a better climate and environmental effect. The transport's direct emissions are obviously the most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective

provide very low, and in some cases net negative, CO₂-equivalent emissions. The requirement gives a significant and substantiated reduction in total emissions over the contract's lifetime. The contracting authority has considered using climate and the environment only as the award criteria. Such a model would, however, only give a relative ranking between the tenders, without ensuring that the delivery is actually low- or zero-emission based. If prices or other criteria are weighted higher, fossil-based solutions can still win the competition. Furthermore, evaluating environmental performance involves methodology challenges connected to documentation, calculation assumptions (e.g. well-to-wheel vs. tank-to-wheel), inspections and verifiability, which can increase the risk of doubt. The minimum requirement reduces this risk by determining a clear and objective level for acceptable environmental performance. The requirement is justifiable, proportional and connected to the delivery. The market can deliver sufficient competition within the stipulated frameworks. The assessments listed above document the environmental, technical and legal considerations that form the basis for choosing requirements, and fulfil the contracting authority's justification obligation in accordance with the Public Procurement Act §5b.

Procedure identifier: a0250f67-2646-447e-813d-e6e5f91b91a2

Internal identifier: 26181

Type of procedure: Open

The procedure is accelerated: no

Main features of the procedure: The competition will be held in accordance with the Public Procurement Act from 17 June 2016 no. 73 (LOA) with the accompanying regulations of 12 August 2016 no. 974 (FOA), as well as the provisions in this tender documentation. The competition will be held as TED - open tender contest in accordance with the regulations Parts I and III. All interested tenderers can submit tenders for this type of procedure. Negotiations are not allowed. The procurement is announced in the DOFFIN and TED database.

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 90000000 Sewage, refuse, cleaning and environmental services

Additional classification (cpv): 90512000 Refuse transport services

2.1.2. Place of performance

Country subdivision (NUTS): Trøndelag/Tröndelage (NO060)

Country: Norway

2.1.4. General information

Legal basis:

Directive 2014/24/EU

2.1.5. Terms of procurement

Terms of submission:

Maximum number of lots for which one tenderer can submit tenders: 3

Terms of contract:

Maximum number of lots for which contracts can be awarded to one tenderer: 3

2.1.6. Grounds for exclusion

Sources of grounds for exclusion: Notice

Corruption: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, by enforceable judgement been convicted of corruption by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Corruption as defined in Article 3 of the

Convention on Combating Corruption, involving European Communities or European Union member states (EUT C 195 of 25.6.1997, s. 1), and in Article 2, point 1, in the Council's framework decision 2003/568/RIA of 22 July 2003 on combating corruption in the private sector (EUT L 192 of 31.7.2003, p. 54). This rejection reason also includes corruption as defined in national law for the contracting authority or supplier.

Fraud: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted of fraud has been convicted of fraud by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Fraud included in Article 1 of the Convention on protection of the Financial Interests of the European Communities (EFT C 316 of 27.11.1995, p. 48).

Money laundering or terrorist financing: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of money laundering or financing terrorism by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Money laundering or financing terrorism As defined in Article 1 of the European Parliament and Council Directive 2005/60/EF of 26 October 2005 on preventive measures against the use of the financial system for money laundering and financing terrorism (EUT L 309 of 25.11.2005, p. 15).

Participation in a criminal organisation: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted verdict of participation in a criminal organisation by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Participation in a criminal organisation as defined in Article 2 of the Council's framework decision 2008/841/RIA of 24 October 2008 on control of organised crime (EUT L 300 of 11.11.2008, p. 42)

Terrorist offences or offences linked to terrorist activities: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002 on combating terrorism (EFT L 164, af 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Child labour and including other forms of trafficking in human beings: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of child labour and other forms of human trafficking by a verdict handed down no more than five years ago, or a rejection period determined directly in the judgement that still applies? Child labour and other forms of human trafficking as defined in Article 2 of the European Parliament and council directive 2011/36/EU of 5. 1 April 2011 on the prevention and control of human trafficking and the protection of its victims and for compensation of the Council's framework decision 2002/629/RIA (EUT L 101 of 15.4.2011, p. 1).

Breaching of obligations in the fields of environmental law: Is the tenderer aware of breaches of environmental provisions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of labour law: Is the tenderer aware of breaches of provisions on working conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of social law: Is the tenderer aware of breaches of provisions on social conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Agreements with other economic operators aimed at distorting competition: Has the tenderer entered into agreement(s) with other tenderers with the intention of turning the competition?

Grave professional misconduct: Has the tenderer committed serious errors in professional practice? If relevant, see the definitions in national law, the relevant notice or procurement documents.

Misrepresentation, withheld information, unable to provide required documents or obtained confidential information of this procedure: Has the tenderer: a) given grossly incorrect information with the notification of the information required to verify that there is no basis for rejection, or of the qualification requirements being fulfilled, b) failed to provide such information, c) made reservations immediately to present the supporting documents requested by the contracting authority, or d) improperly affected the contracting authority's decision process to acquire confidential information that could give this an unlawful advantage in connection with competition, or negligently has given misleading information that can have a significant influence on decisions on rejection, selection or award?

Conflict of interest due to its participation in the procurement procedure: Are tenderers aware of a conflict of interest as stated in national law, the relevant notice or procurement documents?

Direct or indirect involvement in the preparation of this procurement procedure: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Early termination, damages, or other comparable sanctions: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions?

Breaching obligation relating to payment of social security contributions: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Breaching obligation relating to payment of taxes: Has the tenderer not fulfilled his tax and duty obligations in the country in which he is established, and in the contracting authority's member state, if this is a different country than what he is established in?

Business activities are suspended: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Bankruptcy: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Arrangement with creditors: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Insolvency: Is the tenderer in an insolvency situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Assets being administered by liquidator: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Analogous situation like bankruptcy, insolvency or arrangement with creditors under national law: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Title: General part

Description: The competition is for three sub-contracts for framework agreements for transport services. The transports involve transporting waste from recycling stations (sub-contract 1), delivery of glass and metal packaging (sub-contract 2) and transporting bulky/large waste (sub-contract 3). Participants in the procurement: Innherred Renovasjon is an intermunicipal sanitation company with its main office in Levanger. We are responsible for the collection and treatment of household waste and sludge in our 9 owner municipalities in Trøndelag: Inderøy, Verdal, Levanger, Frosta, Stjørdal, Meråker, Malvik, Selbu and Tydal. The estimated value per annum and the maximum value for the entire contract period per sub-contract, including any options and the expected price rise are stated in point 1.1.4. The need is uncertain. The volume can vary both up and down and the contract period will depend on, among other things, the contracting authority's needs, activities, budgetary situations and other framework factors. See the procurement documents for further information. The contract is subject to cancellation of the competition, i.e. in connection with budgetary coverage and the board's approval. The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a

better climate and environmental effect. The transport's direct emissions are obviously the most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective provide very low, and in some cases net negative, CO₂-equivalent emissions. The requirement gives a significant and substantiated reduction in total emissions over the contract's lifetime. The contracting authority has considered using climate and the environment only as the award criteria. Such a model would, however, only give a relative ranking between the tenders, without ensuring that the delivery is actually low- or zero-emission based. If prices or other criteria are weighted higher, fossil-based solutions can still win the competition. Furthermore, evaluating environmental performance involves methodology challenges connected to documentation, calculation assumptions (e.g. well-to-wheel vs. tank-to-wheel), inspections and verifiability, which can increase the risk of doubt. The minimum requirement reduces this risk by determining a clear and objective level for acceptable environmental performance. The requirement is justifiable, proportional and connected to the delivery. The market can deliver sufficient competition within the stipulated frameworks. The assessments listed above document the environmental, technical and legal considerations that form the basis for choosing requirements, and fulfil the contracting authority's justification obligation in accordance with the Public Procurement Act §5b.

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers shall have their tax and VAT payments in order.

Documentation requirement: Certificate for tax and VAT that documents compliance with tax and duty conditions. Norwegian tenderers: The certificate can be ordered from the altinn.no (RF-1507). Foreign tenderers: Certificate issued by the competent authority of the member

country, confirming that the tenderer has met the obligations in relation to the payment of VAT, taxes and social security contributions in the country where the tenderer/contractor belongs. Note: The certificate shall not be older than 4 months from the tender deadline. The limit of four months is set to ensure that the certificate is valid at the time of award, cf. the Procurement Act § 51, which states that the certificate shall not be older than 6 months calculated from the time of award. According to the regulations §17-1(4), the Contracting Authority does not have the opportunity to request the certificate if it has already been received. If you have submitted a tax certificate to the contracting authority and it is still valid at the time of the tender submission for this competition, you will not be required to present a certificate now. If so, state when you have previously submitted the certificate and to whom. You can, however, enclose the certificate voluntarily if you want.

Criterion: Other economic or financial requirements

Description of selection criterion: Requirements regarding the tenderer's economic and financial position: The economic capacity to fulfil this contract is required. Documentation requirement: The contracting authority will assess finances through the company and accounting information system Proff Forvalt (www.forvalt.no). The contracting authority reserves the right to obtain supplementary information about the tenderer's finances. Any need for support from other companies to fulfil this qualification requirement. If the tenderer is dependent on other companies to fulfil this qualification requirement, please provide an account below. The contracting authority will, in such cases, also assess the finances of the support business in the same way. If so, the contracting authority reserves the right to obtain supplementary information, commitment statement, bank guarantees etc.

The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a better climate and environmental effect. The transport's direct emissions are obviously the

most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective provide very low, and in some cases net negative, CO₂-equivalent emissions. The requirement gives a significant and substantiated reduction in total emissions over the contract's lifetime. The contracting authority has considered using climate and the environment only as the award criteria. Such a model would, however, only give a relative ranking between the tenders, without ensuring that the delivery is actually low- or zero-emission based. If prices or other criteria are weighted higher, fossil-based solutions can still win the competition. Furthermore, evaluating environmental performance involves methodology challenges connected to documentation, calculation assumptions (e.g. well-to-wheel vs. tank-to-wheel), inspections and verifiability, which can increase the risk of doubt. The minimum requirement reduces this risk by determining a clear and objective level for acceptable environmental performance. The requirement is justifiable, proportional and connected to the delivery. The market can deliver sufficient competition within the stipulated frameworks. The assessments listed above document the environmental, technical and legal considerations that form the basis for choosing requirements, and fulfil the contracting authority's justification obligation in accordance with the Public Procurement Act §5b.

Internal identifier: 1938201-2

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 90000000 Sewage, refuse, cleaning and environmental services

Additional classification (cpv): 90512000 Refuse transport services

5.1.2. Place of performance

Country subdivision (NUTS): Trøndelag/Tröndelage (NO060)

Country: Norway

5.1.3. Estimated duration

Start date: 01/02/2027

Duration end date: 31/01/2033

5.1.4. Renewal

Maximum renewals: 2

Other information about renewals: Renewal length is 12 months

5.1.5. Value

Estimated value excluding VAT: 11 000 000,00 NOK

5.1.6. General information

Reserved participation:

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: Other economic or financial requirements

Description of selection criterion: Tenderers shall have their tax and VAT payments in order.

Documentation requirement: Certificate for tax and VAT that documents compliance with tax

and duty conditions. Norwegian tenderers: The certificate can be ordered from the altinn.no (RF-1507). Foreign tenderers: Certificate issued by the competent authority of the member country, confirming that the tenderer has met the obligations in relation to the payment of VAT, taxes and social security contributions in the country where the tenderer/contractor belongs. Note: The certificate shall not be older than 4 months from the tender deadline. The limit of four months is set to ensure that the certificate is valid at the time of award, cf. the Procurement Act § 5l, which states that the certificate shall not be older than 6 months calculated from the time of award. According to the regulations §17-1(4), the Contracting Authority does not have the opportunity to request the certificate if it has already been received. If you have submitted a tax certificate to the contracting authority and it is still valid at the time of the tender submission for this competition, you will not be required to present a certificate now. If so, state when you have previously submitted the certificate and to whom. You can, however, enclose the certificate voluntarily if you want.

Criterion: Other economic or financial requirements

Description of selection criterion: Requirements regarding the tenderer's economic and financial position: The economic capacity to fulfil this contract is required. Documentation requirement: The contracting authority will assess finances through the company and accounting information system Proff Forvalt (www.forvalt.no). The contracting authority reserves the right to obtain supplementary information about the tenderer's finances. Any need for support from other companies to fulfil this qualification requirement. If the tenderer is dependent on other companies to fulfil this qualification requirement, please provide an account below. The contracting authority will, in such cases, also assess the finances of the support business in the same way. If so, the contracting authority reserves the right to obtain supplementary information, commitment statement, bank guarantees etc.

Review organisation: Trøndelag tingrett

Information about review deadlines: -

5.1. Lot: LOT-0004

Title: Tender sub-contract 1 Waste from recycling stations

Description: The competition is for three sub-contracts for framework agreements for transport services. The transports involve transporting waste from recycling stations (sub-contract 1), delivery of glass and metal packaging (sub-contract 2) and transporting bulky/large waste (sub-contract 3). Participants in the procurement: Innherred Renovasjon is an intermunicipal sanitation company with its main office in Levanger. We are responsible for the collection and treatment of household waste and sludge in our 9 owner municipalities in Trøndelag: Inderøy, Verdal, Levanger, Frosta, Stjørdal, Meråker, Malvik, Selbu and Tydal. The estimated value per annum and the maximum value for the entire contract period per sub-contract, including any options and the expected price rise are stated in point 1.1.4. The need is uncertain. The volume can vary both up and down and the contract period will depend on, among other things, the contracting authority's needs, activities, budgetary situations and other framework factors. See the procurement documents for further information. The contract is subject to cancellation of the competition, i.a. in connection with budgetary coverage and the board's

approval. The contracting authority has assessed the procurement against the Public Procurement Act § 5h and concluded that there is no requirement for apprentices in this procurement as the contract's main element does not include work where it is relevant to use labour with certificates of apprenticeship or craft, cf. the Procurement Act § 5h 2nd section letter c, subsidiary because the need requires specialised competence or for other reasons is not suitable for apprentices, Cf. the Public Procurement Act § 5h 4 paragraph. The following applies for sub-contract 1: The contracting authority has decided to set a minimum requirement from and including other contract years that vehicles used in the contract shall use biogas, hydrogen or electricity as an energy carrier. The requirement is meant to meet the Public Procurement Act §5b, which allows public contracting authorities to use climate and environmental requirements in the requirement specifications, if it is clear that this provides a better climate and environmental effect. The transport's direct emissions are obviously the most important part of the contract's total environmental impact. For example, a diesel vehicle with emissions of approx. 200 g CO₂/km and an annual driving length of 40,000 km will generate approx. 8 tonnes of CO₂ per annum. Hydrogen and battery electrical vehicles have zero direct emissions in the operational phase, while biogas vehicles in the lifetime perspective provide very low, and in some cases net negative, CO₂-equivalent emissions.
