2.1. Procedure

Title: DPS Qualification__Provision of Remote Health Monitoring Technologies to Support the Implementation of Virtual Ward Care Model Solutions (HSE ref. 23112)

Description: The HSE is issuing this Request to Participate ("RTP") in a Dynamic Purchasing System (hereafter 'the DPS') for the provision of Remote Health Monitoring Technologies to support the implementation of Virtual Ward care models via a fully end to end vendor managed solution. The HSE is the Contracting Authority for this public procurement competition on its own behalf and on behalf of all organisations funded by the HSE. A Virtual Ward is a time-limited, safe, and efficient alternative to bedded care enabled by technology that aims to support people who have an acute condition, or exacerbation of a chronic condition requiring hospital-level care, to receive this high acuity care in the place they call home. This approach can provide both an alternative to hospital admission at the Emergency Department, and/or facilitate an earlier discharge from a hospital ward for medical and surgical patients. This DPS will support the implementation of Virtual Wards and associated service capabilities within adult, older persons, and paediatric services across, but not limited to, respiratory, cardiology, and endocrinology pathways. The HSE is seeking to procure an effective and successful market proven, end-to-end vendor managed solution ready for immediate deployment. A central component of the Virtual Ward Solution supported by Remote Health Monitoring Technologies service will be a comprehensive fully vendor managed (end-to-end) solution, including the provision and support of a suite of web-based application(s) and clinical measurement equipment, to facilitate acute clinical care delivered remotely by a multidisciplinary team (MDT) if clinically appropriate and with clear lines of

clinical responsibility and governance. This solution will facilitate the avoidance of hospital admission and/or early hospital discharge by providing safe technology that allows suitable patients to be clinically monitored from where they call home.

Procedure identifier: d84017e6-afa0-4905-96d8-354b6c1c7cbe

Type of procedure: Open

The procedure is accelerated: no

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 72600000 Computer support and consultancy services

Additional classification (cpv): 72000000 IT services: consulting, software development, Internet and support, 85000000 Health and social work services, 48000000 Software package and information systems, 80000000 Education and training services, 98000000 Other community, social and personal services, 48500000 Communication and multimedia software package, 48100000 Industry specific software package, 48900000 Miscellaneous software package and computer systems, 72212222 Web server software development services

2.1.3. Value

Estimated value excluding VAT: 500 000 000,00 EUR

Maximum value of the framework agreement: 0,00 EUR

2.1.4. General information

Legal basis:

Directive 2014/24/EU

2.1.5. Terms of procurement

Terms of submission:

Maximum number of lots for which one tenderer can submit tenders: 0

2.1.6. Grounds for exclusion

Purely national exclusion grounds: Please refer to the tender documents for further information

5. Lot

5.1. Lot: LOT-0001
