Norway – Television and audio-visual equipment – Inspisient system for DNS's modernisation project.

OJ S 206/2026 23/10/2026

Contract or concession notice – standard regime

Supplies

1. Buyer

1.1. Buyer

Official name: AS Den Nationale Scene

Email: dns@dns.no

Legal type of the buyer: Public undertaking, controlled by a central government authority

Activity of the contracting authority: Recreation, culture and religion

2. Procedure

2.1. Procedure

Title: Inspisient system for DNS's modernisation project.

Description: The contracting authority's objective with this procurement is to enter into a contract for the delivery of an inspicient system, which shall function as the general management and automation system for the inspicient functions. The procurement also includes the accompanying systems for directing communication, accessories, inspections, CUE lighting, infrastructure and text monitors. Parts of the deliveries are separated as options, for i.a. for budgetary reasons. Which options will be released will primarily be clarified during the detailed engineering design phase. The last deadline for triggering options for equipment is the date of hand-over of the facility. See Annex 3 Price Form for an overview of what are the options. The system shall give the inspicient and technical personnel a common tool for management, monitoring and coordination of production related functions. The system is intended as an operational interface between people and technical systems and it shall not replace dedicated sound, lighting, video or technical stage control systems.

Procedure identifier: f516b4cf-e466-48f5-a36a-9a7cdcf6f786

Internal identifier: 27005

Type of procedure: Open

The procedure is accelerated: no

2.1.1. Purpose

Main nature of the contract: Supplies

Main classification (cpv): 32320000 Television and audio-visual equipment

Additional classification (cpv): 31700000 Electronic, electromechanical and electrotechnical supplies, 32000000 Radio, television, communication, telecommunication and related equipment, 32200000 Transmission apparatus for radiotelephony, radiotelegraphy, radio broadcasting and television, 32300000 Television and radio receivers, and sound or video recording or reproducing apparatus, 32330000 Apparatus for sound, video-recording and reproduction, 32340000 Microphones and loudspeakers, 32342412 Speakers, 32342420 Studio mixing console, 32360000 Intercom equipment, 32400000 Networks, 32420000

Network equipment, 32500000 Telecommunications equipment and supplies, 45212322 Theatre construction work, 51300000 Installation services of communications equipment, 92000000 Recreational, cultural and sporting services

2.1.2. Place of performance

Town: Bergen

Postcode: 5011

Country subdivision (NUTS): Vestland (NO0A2)

Country: Norway

2.1.3. Value

Estimated value excluding VAT: 14 000 000,00 NOK

2.1.4. General information

Additional information: Climate and environmental considerations in the procurement, cf. the Public Procurement Regulations § 5b The procurement concerns an insipient system that mainly consists of electronic equipment, technical components and software. The contracting authority estimates that long lifetime, repairability and reduced need for replacing equipment are the most important measures for limiting the environmental impact of the procurement. A market dialogue has been carried out with several relevant tenderers. The dialogue shows that the tenderers offer relatively comparable solutions, with limited differences in energy consumption and the components' environmental properties. At the same time, the dialogue shows that the market can deliver systems that fulfil the requirements for long technical lifetime, repairability and long-term maintenance. The contracting authority has therefore chosen to set seven obligatory climate and environmental requirements that, among other things, ensure a minimum of 10 years expected technical lifetime, repairability and access to spare parts, long-term software support, energy efficient operation, remote support and a minimum of five years guarantee. A service and maintenance contract shall also be signed for 5 years, with further options for an extension. The contract includes one planned physical service visit per annum, whilst other follow-up as far as possible shall occur via remote support in order to limit the transport need. The contracting authority considers that obligatory requirements for long lifetime, repairability and maintenance give a better environmental effect than using these conditions as award criteria. The requirements ensure that all offered systems fulfil a high minimum level, rather than a shorter lifetime or a smaller degree of repairability can be compensated through a lower price. At the same time, the market dialogue suggests that the potential for further environmental gains through point setting differences between the systems is limited. Combined requirements are expected to reduce resource consumption, electronic waste and transport needs throughout the system's lifetime. The contracting authority considers, on this basis, that the climate and environmental requirements in the requirement specifications provide a better environmental effect than the use of climate and environmental considerations as the award criteria, cf. the Public Procurement Regulations § 5b.

Legal basis:

Directive 2014/24/EU

2.1.6. Grounds for exclusion

Sources of grounds for exclusion: Notice

Corruption: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, by enforceable judgement been convicted of corruption by a verdict handed down not more than five years ago, or a rejection period

determined directly in the judgement that still applies? Corruption as defined in Article 3 of the Convention on Combating Corruption, involving European Communities or European Union member states (EUT C 195 of 25.6.1997, s. 1), and in Article 2, point 1, in the Council's framework decision 2003/568/RIA of 22 July 2003 on combating corruption in the private sector (EUT L 192 of 31.7.2003, p. 54). This rejection reason also includes corruption as defined in national law for the contracting authority or supplier.

Fraud: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted of fraud has been convicted of fraud by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Fraud included in Article 1 of the Convention on protection of the Financial Interests of the European Communities (EFT C 316 of 27.11.1995, p. 48).

Money laundering or terrorist financing: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of money laundering or financing terrorism by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Money laundering or financing terrorism As defined in Article 1 of the European Parliament and Council Directive 2005/60/EF of 26 October 2005 on preventive measures against the use of the financial system for money laundering and financing terrorism (EUT L 309 of 25.11.2005, p. 15).

Participation in a criminal organisation: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted verdict of participation in a criminal organisation by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Participation in a criminal organisation as defined in Article 2 of the Council's framework decision 2008/841/RIA of 24 October 2008 on control of organised crime (EUT L 300 of 11.11.2008, p. 42)

Terrorist offences or offences linked to terrorist activities: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002 on combating terrorism (EFT L 164, of 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Child labour and including other forms of trafficking in human beings: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of child labour and other forms of human trafficking by a verdict handed down no more than five years ago, or a rejection period determined directly in the judgement that still applies? Child labour and other forms of human trafficking as defined in Article 2 of the European Parliament and council directive 2011/36/EU of 5. 1 April 2011 on the prevention and control of human trafficking and the protection of its victims and for compensation of the Council's framework decision 2002/629/RIA (EUT L 101 of 15.4.2011, p. 1).

Breaching of obligations in the fields of environmental law: Is the tenderer aware of breaches of environmental provisions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of labour law: Is the tenderer aware of breaches of provisions on working conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of social law: Is the tenderer aware of breaches of provisions on social conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Agreements with other economic operators aimed at distorting competition: Has the tenderer entered into agreement(s) with other tenderers with the intention of turning the competition?

Grave professional misconduct: Has the tenderer committed serious errors in professional practice? If relevant, see the definitions in national law, the relevant notice or procurement documents.

Misrepresentation, withheld information, unable to provide required documents or obtained confidential information of this procedure: Have the tenderer: a) given grossly incorrect information when notifying the information required to verify that there is no basis for rejection, or of the qualification requirements being met, b) failed to provide such information, c) subject to immediately submitting the supporting documents requested by the Contracting Authority, or d) improperly affecting the Contracting Authority's decision process to acquire confidential information that could give this an unlawful advantage in connection with competition, or negligently has given misleading information that can have a significant influence on decisions on rejection, selection or award?

Conflict of interest due to its participation in the procurement procedure: Are tenderers aware of a conflict of interest as stated in national law, the relevant notice or procurement documents?

Direct or indirect involvement in the preparation of this procurement procedure: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Early termination, damages, or other comparable sanctions: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions? Breaching obligation relating to payment of social security contributions: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Breaching obligation relating to payment of taxes: Has the tenderer not fulfilled his tax and duty obligations in the country in which he is established, and in the contracting authority's member state, if this is a different country than what he is established in?

Business activities are suspended: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Bankruptcy: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Arrangement with creditors: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Insolvency: Is the tenderer in an insolvency situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Assets being administered by liquidator: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Analogous situation like bankruptcy, insolvency or arrangement with creditors under national law: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

5. Lot

5.1. Lot: LOT-0000

Title: Inspisient system for DNS's modernisation project.

Description: The contracting authority's objective with this procurement is to enter into a contract for the delivery of an inspicient system, which shall function as the general management and automation system for the inspicient functions. The procurement also includes the accompanying systems for directing communication, accessories, inspections, CUE lighting, infrastructure and text monitors. Parts of the deliveries are separated as options, for i.a. for budgetary reasons. Which options will be released will primarily be clarified during the detailed engineering design phase. The last deadline for triggering options for equipment is the date of hand-over of the facility. See Annex 3 Price Form for an overview of what are the options. The system shall give the inspicient and technical personnel a common tool for management, monitoring and coordination of production related functions. The system is intended as an operational interface between people and technical systems and it shall not replace dedicated sound, lighting, video or technical stage control systems.

Internal identifier: 27005

5.1.1. Purpose

Main nature of the contract: Supplies

Main classification (cpv): 32320000 Television and audio-visual equipment

Additional classification (cpv): 31700000 Electronic, electromechanical and electrotechnical supplies, 32000000 Radio, television, communication, telecommunication and related equipment, 32200000 Transmission apparatus for radiotelephony, radiotelegraphy, radio broadcasting and television, 32300000 Television and radio receivers, and sound or video recording or reproducing apparatus, 32330000 Apparatus for sound, video-recording and reproduction, 32340000 Microphones and loudspeakers, 32342412 Speakers, 32342420 Studio mixing console, 32360000 Intercom equipment, 32400000 Networks, 32420000

Network equipment, 32500000 Telecommunications equipment and supplies, 45212322 Theatre construction work, 51300000 Installation services of communications equipment, 92000000 Recreational, cultural and sporting services

Options:

Description of the options: The agreement has a service agreement for 5 years, with an option for an extension. Parts of the requested goods are included as options, which will be taken up if there are funds. See Annex 2 Price Form, for which products are options.

5.1.2. Place of performance

Town: Bergen

Postcode: 5011

Country subdivision (NUTS): Vestland (NO0A2)

Country: Norway

5.1.3. Estimated duration

Start date: 01/04/2027

Duration: 18 Months

5.1.5. Value

Estimated value excluding VAT: 14 000 000,00 NOK

5.1.6. General information

Reserved participation:

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

This procurement is also suitable for small and medium-sized enterprises (SMEs): yes

Additional information: Climate and environmental considerations in the procurement, cf. the Public Procurement Regulations § 5b The procurement concerns an insipient system that mainly consists of electronic equipment, technical components and software. The contracting authority estimates that long lifetime, repairability and reduced need for replacing equipment are the most important measures for limiting the environmental impact of the procurement. A market dialogue has been carried out with several relevant tenderers. The dialogue shows that the tenderers offer relatively comparable solutions, with limited differences in energy consumption and the components' environmental properties. At the same time, the dialogue shows that the market can deliver systems that fulfil the requirements for long technical lifetime, repairability and long-term maintenance. The contracting authority has therefore chosen to set seven obligatory climate and environmental requirements that, among other things, ensure a minimum of 10 years expected technical lifetime, repairability and access to spare parts, long-term software support, energy efficient operation, remote support and a minimum of five years guarantee. A service and maintenance contract shall also be signed for 5 years, with further options for an extension. The contract includes one planned physical service visit per annum, whilst other follow-up as far as possible shall occur via remote support in order to limit the transport need. The contracting authority considers that obligatory requirements for long lifetime, repairability and maintenance give a better environmental effect than using these conditions as award criteria. The requirements ensure that all offered systems fulfil a high minimum level, rather than a shorter lifetime or a smaller degree of repairability can be compensated through a lower price. At the same time, the market dialogue suggests that the potential for further environmental gains through point setting differences between the systems is limited. Combined requirements are expected to reduce resource consumption, electronic waste and transport needs throughout the system's lifetime. The

contracting authority considers, on this basis, that the climate and environmental requirements in the requirement specifications provide a better environmental effect than the use of climate and environmental considerations as the award criteria, cf. the Public Procurement Regulations § 5b.

5.1.9. Selection criteria

Sources of selection criteria: Procurement Document

5.1.10. Award criteria

Criterion:

Type: Price

Name: Price

Description: Price The evaluation price consists of the sum of the requested system/sub-system, including all costs associated with the procurement and a 5 year service contract. The system/subsystem for evaluation consists of • Inspisient system (general) • Regikommunikasjon • Hearing • Inspection • Infrastructure • Text monitors The evaluation price does not include an option for a CUE system. See Annex 2 Price Form for an overview of the cost elements included in the evaluation price. Documentation: Complete annex 2 Price Form. The document contains a total of 9 tabs, one for each system/sub-system and an option, service agreement, as well as a sheet for summary (sum) of all prices, where the evaluation price is given.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 25

Criterion:

Type: Quality

Name: Quality of the offered system

Description: The contracting authority would like a system that is suitable for intended use and that gives a real excess value, at the same time that the system is within the budgetary frameworks. An assessment will be made of the elements below. The various elements are weighted equal to: 1. Technical and functional quality as regards performance and suitability (product data sheet, possibly a description in the solution proposal). 2. Integration and interface (system form, description in the solution proposal). 3. Robustness and operational reliability of the components (described in the solution proposal). 4. User friendliness and system operations (described in the solution proposal, possibly with examples, sketch of inspisientpult etc.). 5. Design/visual expression, possibility for adaptation to existing buildings (product data sheet and description in solution proposal, example pictures). 6. Degree of scalability and flexibility for different sub-systems as regards future changes/expansions (described in the solution proposal). Documentation: The different elements included in the award criteria are documented by the following documentation: • Product data sheet for all products specified in the price form (all sheets). • System form (for individual systems and combined), with the development of how the systems communicate • The tenderer's own solution proposal, including any illustrations, examples, sketches, pictures etc. NB! The solution proposal must be structured in accordance with the six factors included in the award criteria, so that it is clear what is being answered. See also detailed requirements for the type of documentation in the italics behind each moment.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 50

Criterion:

Type: Quality

Name: Offered Core Team

Description: The team must have a minimum of three, and a maximum of four different resources, with a resource having several roles. This team shall be responsible for the delivery. The team shall cover the following roles: • Project manager (responsible for the engineering design services and any coordination of sub-suppliers) • Programmer • Construction manager, who shall be present daily when there is activity on the building. • Responsible installer The contract will i.a. be evaluated on the following: • Scope of relevant experience in requested roles from the delivery of equivalent systems. Equivalent solutions means the delivery of several of the requested sub-systems/product groups included in this delivery. This factor is somewhat more significant. • How available competence and experience is used to carry out relevant assignments in a way that contributes to high quality in the project implementation. • It is an advantage if the project manager and programmer have good product knowledge. • Measures that ensure progress and quality, in case of any illness and absence from the core team (brief description). • It is an advantage if resources in the core team have experience from work in listed/listed buildings. Only experience for the up to 4 resources included in the four requested roles will be weighted in the evaluation. An overall assessment of the factors above will be made. Documentation: The tenderer's own description of the offered core team, of up to 3 A4 pages, font strips. minimum 10. The description must as a minimum contain • the names of offered resources in different roles • Description of relevant experience from equivalent deliveries, including a description of the named project where the resources have contributed, description of the resource's role and work performed in the project. • A description of how the different resources shall be used for various relevant assignments. • any extent of experience from listed/listed buildings, with examples.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 15

Criterion:

Type: Quality

Name: Implementation plan

Description: An overall assessment will be made of the elements below: • Milestone plan, with central challenges and dependencies • Involvement of users (DNS) in the detailed engineering design phase. • How adaptations of the user interface will be facilitated in the completion phase and the trial operation period. NB! Any measures must be binding and included in the price items in Annex 3 in order to get paid. Documentation: The tenderer's own description, including any milestone chart. Maximum 2 A4 pages, font strips. minimum 10, in addition to any schematic presentation of the milestone plan.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 10

5.1.11. Procurement documents

Address of the procurement documents: https://eu.eu-supply.com/app/rfq/rwlenrance_s.asp?PID=462345&TID=200422646&B=

5.1.12. Terms of procurement

Terms of submission:

Electronic submission: Required

Address for submission: https://eu.eu-supply.com/app/rfq/rwlenrance_s.asp?PID=462345&TID=200422646&B=

Languages in which tenders or requests to participate may be submitted: Norwegian

Electronic catalogue: Not allowed

Variants: Not allowed

Tenderers may submit more than one tender: Not allowed

Deadline for receipt of tenders: 25/11/2026 11:00:00 (UTC+00:00) Western European Time, GMT

Duration during which the tender must remain valid: 3 Months

Terms of contract:

The execution of the contract must be performed within the framework of sheltered employment programmes: No

Electronic invoicing: Required

Electronic ordering will be used: yes

Electronic payment will be used: yes

5.1.15. Techniques

Framework agreement:

No framework agreement

Information about the dynamic purchasing system:

No dynamic purchase system

5.1.16. Further information, mediation and review
