#### 2.1. Procedure

Title: 415 Framework agreement, programme, project and senior project manager.

Description: Norwegian nuclear decommunication has been given the task of carrying out the clean-up in accordance with Norway's nuclear activity. The assignment consists of winding down the Norwegian nuclear facilities, located in Kjeller and Halden, as well as handling all man-made radioactive waste for the benefit of today's and future generations.

Decommissioning of the installations includes removing radioactive sources, disassembling equipment and systems, demolishing structures and buildings, and transferring radioactive material to a facility that is certified for reception, storage and landfill. The assignment requires an extensive scope of planning and review work in the form of thorough mapping, condition surveys and preparations in many different areas. NND and IFE-NUK need to hire resources to assist with the management of programmes and the execution of projects. NND and IFE-NUK intend to enter into parallel framework agreements that shall cover the following areas: 1. Presenter and senior project manager with responsibility for major projects, e.g. responsibility for a project programme. 2. Project manager with minor areas of responsibility, including, for example, technical project managers. NND intends to enter into a contract with between 3-6 tenderers provided that there are a sufficient number of qualified tenderers and suitable tenders.
