**2.1. Procedure**

Title: Project Manager E1 - NVO (1)

Description: The assignment is for a project manager for the water treatment plant/process plant, which is being constructed in the rock halls at Huseby in Oslo. The treatment plant is one of the most demanding technical installations that have been built in Norway. There are similarities in the execution on par with major processing plants in oil and gas and the technical industry. Technically the installation is generally clear, but due to its size and execution of rock room, it is very complicated with many dependencies between the disciplines and phases. One extra demanding factor is the construction of the plant underground. The project will be executed as a collaboration in alliance with engineering design services and contractor parties. This will make major demands on the person who is leading this work.
