Activity of the contracting authority: General public services

2. Procedure

2.1. Procedure

Title: 9131 Cleaning tunnels Innlandet 2026-2031

Description: Cleaning tunnels Inland. The assignment comprises operational and maintenance assignments, on national roads and national foot/cycle paths with accompanying side facilities, side areas, equipment and installations, in Nannestad, Ullensaker, Stange, Eidsvoll, Nittedal, Gjøvik, Ringsaker, Flå, Krødsherad, Ringerike, Vang, Sør-Aurdal, Gran, Lunner, Øyer, Sør-Fron, Nord-Fron, Vågå, Lillehammer, Kongsvinger D2-V1 and D2-S20. List of the main assignments in the contract: • Cleaning of tunnels and lids, including technical equipment and roadways. • Inspections as well as operation and maintenance of water and sewage installations in tunnels such as sand traps, sedimentation installations, oil separators, pumps, pipe systems, valves etc. • Inspections and function inspections of fire manholes and fire hydrants • Inspection of drainage systems • Inspections of gates, hatches and doors • Traffic management and work notification including the preparation of sign plans as well as ensuring approved sign plans from the sign authority.

Procedure identifier: be8f5114-a37e-46e1-8846-60dfd60f4d9f

Internal identifier: 24/232991

Type of procedure: Open

The procedure is accelerated: no

2.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 63712320 Tunnel operation services

Additional classification (cpv): 45000000 Construction work

2.1.2. Place of performance

Country subdivision (NUTS): Innlandet (NO020)

Country: Norway

Additional information: Inland

2.1.4. General information

Additional information: A tender conference will be held 2026-03-02 (2 March 2026) in Lillehammer, with an option for participation via Microsoft Teams. The meeting link for MS Teams will be posted in the KGV by 27.02.2026 at the latest. 12.00-14.00

Legal basis:

Directive 2014/24/EU

2.1.6. Grounds for exclusion

Sources of grounds for exclusion: Notice

Corruption: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a enforceable verdict has been convicted of corruption by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Corruption as defined in Article 3 of the Convention on Combating Corruption, Involving European Communities or European Union Member States (EUT C 195 of 25.6.1997, s. 1), and in Article 2, point 1, in the Council's framework decision 2003/568/RIA of 22 July 2003 on combating corruption in the private sector (EUT L 192 of 31.7.2003, p. 54). This rejection reason also includes corruption as defined in national law for the contracting authority or supplier.

Fraud: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted of fraud has been convicted of fraud by a verdict handed down not more than five years ago, or a rejection period determined directly in the judgement that still applies? Fraud included in Article 1 of the Convention on protection of the Financial Interests of the European Communities (EFT C 316 of 27.11.1995, p. 48).

Money laundering or terrorist financing: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of money laundering or financing terrorism by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Money laundering or financing terrorism As defined in Article 1 of the European Parliament and Council Directive 2005/60/EF of 26 October 2005 on preventive measures against the use of the financial system for money laundering and financing terrorism (EUT L 309 of 25.11.2005, p. 15).

Participation in a criminal organisation: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, at the time a legally convicted verdict of participation in a criminal organisation by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Participation in a criminal organisation as defined in Article 2 of the Council's framework decision 2008/841/RIA of 24 October 2008 on control of organised crime (EUT L 300 of 11.11.2008, p. 42)

Terrorist offences or offences linked to terrorist activities: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set out directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002

on combating terrorism (EFT L 164, af 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Child labour and including other forms of trafficking in human beings: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of child labour and other forms of human trafficking by a verdict handed down no more than five years ago, or a rejection period determined directly in the judgement that still applies? Child labour and other forms of human trafficking as defined in Article 2 of the European Parliament and council directive 2011/36/EU of 5. 1 April 2011 on the prevention and control of human trafficking and the protection of its victims and for compensation of the Council's framework decision 2002/629/RIA (EUT L 101 of 15.4.2011, p. 1).

Breaching of obligations in the fields of environmental law: Is the tenderer aware of breaches of environmental provisions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of labour law: Is the tenderer aware of breaches of provisions on working conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Breaching of obligations in the fields of social law: Is the tenderer aware of breaches of provisions on social conditions as stated in national law, the relevant notice or procurement documents or Article 18 (2) of Directive 2014/24/EU.

Agreements with other economic operators aimed at distorting competition: Has the tenderer entered into agreement(s) with other tenderers with the intention of turning the competition?

Grave professional misconduct: Has the tenderer committed serious errors in professional practice? If relevant, see the definitions in national law, the relevant notice or procurement documents.

Misrepresentation, withheld information, unable to provide required documents or obtained confidential information of this procedure: Have the tenderer:a) given grossly incorrect information when notifying the information required to verify that there is no basis for rejection, or of the qualification requirements being met,b) failed to provide such information,c) subject to immediately submitting the supporting documents requested by the Contracting Authority, ord) improperly affecting the Contracting Authority's decision process to acquire confidential information that could give this an unlawful advantage in connection with competition, or negligently has given misleading information that can have a significant influence on decisions on rejection, selection or award?

Conflict of interest due to its participation in the procurement procedure: Are tenderers aware of a conflict of interest as stated in national law, the relevant notice or procurement documents?

Direct or indirect involvement in the preparation of this procurement procedure: Has the tenderer or an entity associated with the supplier advised the contracting authority or in another way been involved in the planning of the competition?

Early termination, damages, or other comparable sanctions: Has the tenderer committed significant breaches of contract in connection with the fulfilment of a previous public contract, a previous contract with a public contracting authority or a previous concession contract, where the breach has led to the cancellation of the contract, compensation or other similar sanctions?

Breaching of obligations set under purely national exclusion grounds: Approved procedures for staffing conditions Does the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, approved procedures for some of the punishable

conditions mentioned above, j.f. the Procurement Regulations § 24-2, (2) paragraph, a-f? Serious errors that cause doubt about his professional integrity Has the tenderer otherwise committed serious errors that cause doubt about his professional integrity, cf.f. the procurement regulations § 24-2, (3) letter in?

Breaching obligation relating to payment of social security contributions: Have tenderers failed to fulfil all their social security obligations in the country where they are established and in their member state, if this is a different country than what he is established in?

Breaching obligation relating to payment of taxes: Has the tenderer not fulfilled his tax and duty obligations in the country in which he is established, and in the contracting authority's member state, if this is a different country than what he is established in?

Business activities are suspended: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Bankruptcy: Is the tenderer in a bankruptcy situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Arrangement with creditors: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Insolvency: Is the tenderer in an insolvency situation? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Assets being administered by liquidator: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Analogous situation like bankruptcy, insolvency or arrangement with creditors under national law: Is the supplier in a situation where he has been forced debt arrangement? Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers made mandatory in accordance with the current national law without the possibility for exceptions.

Fron, Nord-Fron, Vågå, Lillehammer, Kongsvinger D2-V1 and D2-S20. List of the main assignments in the contract: • Cleaning of tunnels and lids, including technical equipment and roadways. • Inspections as well as operation and maintenance of water and sewage installations in tunnels such as sand traps, sedimentation installations, oil separators, pumps, pipe systems, valves etc. • Inspections and function inspections of fire manholes and fire hydrants • Inspection of drainage systems • Inspections of gates, hatches and doors • Traffic management and work notification including the preparation of sign plans as well as ensuring approved sign plans from the sign authority.

Internal identifier: 24/232991

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 63712320 Tunnel operation services

Additional classification (cpv): 45000000 Construction work

Options:

Description of the options: By agreement, the parties can extend the contract for a period of further 12, 24 or 36 months, cf. chapter C3, point 19.

5.1.2. Place of performance

Country subdivision (NUTS): Innlandet (NO020)

Country: Norway

Additional information: Inland

5.1.3. Estimated duration

Duration: 5 Years

5.1.6. General information

Reserved participation:

Participation is not reserved.

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): yes

Additional information: A tender conference will be held 2026-03-02 (2 March 2026) in Lillehammer, with an option for participation via Microsoft Teams. The meeting link for MS Teams will be posted in the KGV by 27.02.2026 at the latest. 12.00-14.00

5.1.9. Selection criteria

Sources of selection criteria: Notice

Criterion: Enrolment in a trade register

Description of selection criterion: Tax certificates Tenderers shall, upon request by the contracting authority, submit a tax certificate for VAT and tax certificates issued by a competent body in the tenderer's home country or the country where the tenderer is established. The certificate shall document whether the tenderer has fulfilled his obligations to pay taxes, duties and social security contributions. The certificate must not be older than 6 months calculated from the deadline for submitting a request for participation in the competition or a tender.

Criterion: Certificates by quality control institutes

Description of selection criterion: Requirements of the tenderer's organisational and legal position. Tenderers shall be a legally established company or consist of a community of tenderers who are legally established companies. The requirement also applies to entities that the tenderer will use. Documentation requirement Tenderers shall, upon request from the contracting authority, enclose a certificate from the Register of Business Enterprises or an

equivalent certificate for statutory registration in the country where the tenderer or the entities that jointly constitute the tenderer are established, as well as certificates for all supporting entities.

Criterion: Financial ratio

Description of selection criterion: Requirements of the tenderer's economic and financial capacity. 1. Tenderers must have sufficient economic and financial capacity to fulfil the contract. 2. The tenderer's equity shall be positive. 3. The tenderer's annual average turnover for the last three years shall be at least NOK 20 million per annum. Documentation requirement Tenderers shall present the following documentation if requested by the contracting authority: 1. The tenderer's annual financial statement, annual report and auditor's report for the last three years and recent information (quarterly accounts) that is of importance to the tenderer's fiscal numbers. 2. A brief account of information on economic conditions or losses that are not documented elsewhere and which is required to be documented in accordance with Norwegian and/or international accounting standards. 3. An overview of any recently executed, ongoing or pending tax or public reviews of the tenderer's activities. 4. An overview of any events of significance that has taken place after publication of the last revised annual accounts. If a tenderer has a justifiable reason for not submitting the documentation that the contracting authority has required, he can document his economic and financial capacity by presenting any other document of relevance to the company's fiscal figures /economy. Tenderers shall justify why they cannot submit the documentation that the contracting authority has required.

Criterion: Technicians or technical bodies for quality control

Description of selection criterion: The tenderer's technical and professional qualifications. Tenderers shall have sufficient experience of a relevant nature and degree of difficulty from: • Cleaning tunnels and external technical equipment (objects) in and around the tunnels. • Operation and maintenance of the water treatment installations such as sand traps, sedimentation basins, oil separators, pump systems, pipe systems, hydrants, valves etc. • Roadworks warning and traffic deviations. Documentation requirement Tenderers shall present the following documentation if requested by the contracting authority: An overview of 3-5 contracts that the tenderer has carried out or executes during the last five years calculated from the tender deadline. The overview shall, cf. the form included in chapter E2, include, among other things, the following for each of the contracts: • Name of the recipient (contracting authority). • Contact person/reference person at the contracting authority with contact data (telephone number and email address) and a statement of the person's role at the contracting authority during the contract. • Date of the delivery. • The contract's value. • What work was carried out by the tenderer, including as the main contractor or sub-contractor, and what work was carried out by sub-contractors. • A description of what the contractual works were about, including relevance to the qualification requirement.

Criterion: Relevant educational and professional qualifications

Description of selection criterion: Implementation ability The tenderer shall: 1. Have the capacity and ability to handle predicted and unforeseen conditions in the contract. 2. Offer sufficient manpower to carry out the contract. 3. Have technical and professional competence and relevant experience with the key personnel offered for fulfilling the contract. Documentation requirement Tenderers shall present the following documentation if requested by the contracting authority: 1. An overview of the tenderer's average workforce and the number of employees in the management in the last three years. 2. An overview of the manpower that the tenderer offers to carry out the contract, including an organisation plan for

the contract. 3. CVs and job descriptions for key personnel, cf. chapter C, including the following resources: • Contract management -Manager - Site manager (the same level as the builder's construction manager). - Quality management manager. - HSE manager • Personnel with professional responsibility for the following activity areas: - Tunnel washing including washing of technical equipment. Emptying and cleaning of sand traps, sedimentation basins, oil separators etc. - Inspection of water treatment plant - Roadworks warning in and connection to tunnels. - Other areas of activity that the tenderer believes are necessary. The same person can cover several functions and activity areas. The site manager can have professional responsibility for one or several activity areas. Tenderers shall substantiate that the offered key personnel will be engaged in work on this contract by accounting for the personnel's employment/function at the time of the tender, presenting a date for planned transfer to this contract and specifying what measures will be considered necessary and will be implemented to achieve this transfer at the right time (plan for completion/liquidation of the personnel's employment/function at the time of the tender). Smaller numbers of key personnel will not be able to be named or allocated to the contract at the time of the tender offer. For these functions a job description shall be enclosed with the accompanying description of competence requirements. Furthermore, an account shall be enclosed for these functions of how the tenderer plans to recruit personnel to these functions. The above requirements also apply for the personnel included in the functions, can be used from sub-contractors.

Criterion: Certificates by quality control institutes

Description of selection criterion: Accident frequency rate (H1-verdi) Tenderers and key contract helpers ought to have an average H1 for the last three years lower than 15. If the H1-value is higher than 15, an account shall be given of the developing trend of the H1-value and possibly the F-value, which will express the severity of any high H1-value. If the tenderer is a working partnership (supplier consortium), the requirements apply for each of the participants. The H1-value is defined as the number of work accidents with absence in relation to the hours work multiplied by 10 exalted in 6. Documentation requirement 1. Overview of the company's H1-value and central contractual partners in the last three years. 2. If the H1-value is higher than 15, an account shall be given of the developing trend of the H1-value and possibly the F-value, which will express the severity of any high H1-value. In addition a separate account shall then be provided as to whether improvement measures have been implemented, and if so also documentation on the effectiveness of these measures.

Criterion: Security of supply

Description of selection criterion: Support from other entities for fulfilment of the qualification requirements. The tenderer can, if necessary, rely on other companies' capacity to fulfil the requirements for economic and financial capacity and/or the requirements for technical and professional qualifications. Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition, each individual entity that the tenderer will use to submit a separate ESPD form when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • Documentation that shows that the tenderer can use the necessary resources for the entities that they will use, for example, a commitment statement from these businesses. The template for the commitment statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. • Documentation that shows that the company(s), that the tenderer will use, fulfil the qualification requirement 'the tenderer's organisational and legal position'. • Documentation that shows that the company(s), that the tenderer will use, fulfil the relevant qualification requirements. • If a tenderer will use the capacity of other companies to fulfil the requirements for economic and financial capacity, a

signed joint and several liability statement must be enclosed. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. If a tenderer will use the capacity of other companies to fulfil the requirements of relevant experience, these entities shall carry out the services or the building and construction work that requires such qualifications.

Criterion: Authorisation or membership of a particular organisation needed for service contracts
Description of selection criterion: Suppliers who participate in a working partnership
Several tenderers can participate in the competition jointly. The community must see to the necessary documentation that all the qualification requirements are met. The contracting authority will assess each individual supplier in the community against the provisions on rejection, cf. § 9-5 and § 24-2, this except the provision in § 9-5 (1) letter a) and § 24-2 (1) letter a) fulfilment of the qualification requirements, which will be applied to the jointly combined set. Tenderers who participate as a working partnership will be assessed collectively for the qualification requirements, with the exception of the requirements for the tenderer's organisational and legal position, documentation for absence of rejection reasons, tax certificates and authority for information on tax and duties (OSA). Tenderers shall confirm that they fulfil this requirement when submitting their tender. In addition each individual entity in the (work) group shall submit separate ESPD forms when submitting a tender. Tenderers shall, upon request from the contracting authority, present the following documentation proof: • An account of the group (including each participant's role), each participant's organisation number, address and nationality. • The same documentation as individual tenderers shall be provided for each individual tenderer who participate in the group. • Declaration of joint and several liability to the contracting authority. The template for a joint and several liability statement is published on: <https://www.vegvesen.no/fag/veg-og-gate/konkurranse-og-kontraktsdokumenter/generelle-kontraktsdokumenter/>. The community of suppliers can, if necessary, rely on other entities to fulfil the qualification requirements, see the point on support from other companies to fulfil the qualification requirements. The contracting authority requires that the tenderer who fulfils the requirements for relevant experience shall carry out the services or the building and construction work that requires such qualifications.

Criterion: Enrolment in a relevant professional register

Description of selection criterion: Particularly on newly established tenderers
A tenderer who is newly established and cannot present all the required documentation must be particularly careful to document and substantiate that they still have the prerequisites required to fulfil the contract. It is particularly important that such tenderers can document a sufficiently large workforce for the execution of the contract, including technical and professional qualifications. Newly established tenderers emphasise that it is the tenderer's ability as such to carry out the contract that is assessed, not individual persons' competence in isolation. If a newly established tenderer has experience from contracts, the most relevant contracts from which the tenderer has experience must be completed in accordance with the documentation requirements regarding relevant experience. This is even if the contracts are of such a nature that they do not fulfil the specified requirements. Missing or inadequate documentation in one or more of the requirements can result in the tenderer being rejected. Insufficient or incorrect completed response form can also lead to rejection. Also tenderers who have established themselves within a new discipline can be seen as newly established

5.1.10. Award criteria

Criterion:

Type: Cost

Name: Lowest price

Description: The contracting authority will choose tenders on the basis of the lowest price.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 100

Criterion:

Type: Quality

Name: Justification for the use of climate and environmental requirements in the requirement specifications.

Description: According to the Public Procurement Regulations § 7-9 (4), the award criterion in accordance with PPR § 7-9 (2) and (3) can be replaced with climate and environmental requirements if it is clear that this provides a better climate and environmental effect. The climate and environmental impact of this procurement is mainly related to requirements for general requirements set for vehicles and machines. The climate and environmental impact of this procurement is mainly related to: • Transport of personnel • Heavy diesel powered vehicles and machines • Waste disposal • Discharge of washing water. • Use of soap • Particulate matter From the contracting authority's assessment, the minimum requirements set in the contract terms will give a better climate effect by ensuring that the winning tenderer fulfils the climate and environmental requirements which are set which is something that is not sure by weighting equivalently with the award criteria. The Norwegian Public Roads Administration has carried out a market survey in connection with the preparation of this contract. The survey shows that there is limited access to emission-free machines and vehicles that are relevant to use for washing/cleaning tunnels. There are therefore only requirements for emission free light vehicles and goods vans. The distances between the tunnels also make it very difficult to transport any electrical machines such as wrong vehicles. There is also a need for enough power from flushing vehicles to washing the tunnel. To achieve such power, we rely on diesel powered machines. Transport of personnel and goods All light vehicles shall be 100% emission free. Light vehicles means passenger cars (M1 /M1G), light goods van (N1/N1G). Emission free means vehicles that have progress based on all-electric or hydrogen. The above requirements do not apply to the use of vehicles for transport to, from and between work places that are not paid separately. The point is taken care of in chapter C3 point 4.6. Requirements regarding vehicles and machines. Setting the minimum requirements results in a better climate effect by ensuring that the winning tenderer fulfils the climate and environmental requirements set, which is something that is not sure by weighting equivalently with award criteria. Heavy diesel powered vehicles and machines Vehicle and machinery requirements: The contract requires that all diesel driven vehicles and machines used in the contract shall, at a minimum, have EURO 6 and STEG 4 certification. See C3 point 4.6. Absorption agents are required in C2 point 30.9. By setting minimum requirements in the contract, we are largely ensured a climate and environmental effect and we therefore consider the climate and environmental gains in this procurement to be better safeguarded through such a requirement position rather than the use of climate and environment as the award criteria. Requirements for the use of soap when washing is taken away Soap shall not be used for washing the wall and roof in the tunnels (chapter D1 37.2 and chapter C3 point 24.2). Brushes are to be used when washing the wall so that the effect of the tunnel washing is sufficient. A reduction in the use of soap will have a positive effect on the consumption of chemicals, as well as that it will help prevent the discharge of soap to recipients and thus provide better conditions for aquatic fauna. It is necessary to use soap for cleaning technical equipment and other objects that are installed in the tunnel. Soap products (chemicals) shall be used in chapter C3 point 24.2 and chapter 24.2. D1 Process 37.2. Requirements for the inspection and sampling programme. A control and sample taking

programme shall be prepared for each tunnel in the chapter. D1 processes 49.5 and C3 point 24.2.1. The measurements shall be carried out so that they become representative of what is actual emissions. The control and measurement programme shall take into account that events can occur during operation. There shall be a system for immediate sample taking and analysing at excess emissions (risk based sample taking) after improvements. Waste disposal Waste is required to be delivered to a waste disposal site approved by the pollution authorities in chapter C2 30.5. As well as chapter D1. several places described delivery fees for waste shall not be included in the price, but that delivery fees for waste are invoiced to the builder without mark-up. As a result, the builder takes the risk of these expenses and the risk that the waste will not be handled as it should be reduced. Temporary storage of waste from the tunnel In order to prevent contamination and waste from going astray at night when the waste receipts are closed, chapter C3 point 24.2.4 requires temporary storage in dense containers until delivery to a certified reception. Particulate matter There are several requirements for the equipment that is used for cleaning the roadway in chapter 1. D1 process 37.2, for example, that a broad suction shall be used, shall be able to take up fine particles/fine dust/particulate matter. There are also requirements in the order of the execution of the laundry in the tunnel in order to reduce the environmental impact.

Category of award weight criterion: Weight (percentage, exact)

Award criterion number: 0
