2.1. Procedimiento

Título: Procurement of an ERP system and assistance (the qualification phase).

Descripción: The aim of the procurement is to procure and introduce a future orientated, cloud based ERP system and hourly consultancy services connected to the system. The Norwegian Health Network would like a contract partner who can deliver a combined, fully integrated system that supports digitalisation, streamlining and automation of processes and services in accounting, budget/forecasts, wages, invoicing, travel/outlay and hour registration (the list is not exhaustive).

Identificador del procedimiento: 2c917a23-38ed-467e-967a-87a6546243bb

Identificador interno: 26/02452

Tipo de procedimiento: Negociado con publicación previa de un anuncio de licitación / licitación con negociación

El procedimiento está acelerado: no

Principales características del procedimiento: The Norwegian Health Network would like to procure standard off-the-shelf products where any adaptations to concrete needs are made through configurations of the tenderer's system(s). The procurement shall cover licences, establishment, configuration and integrations, as well as migration of data from the current system, in addition to training and introduction to the organisation. The system shall be delivered as a cloud service (SaaS), and the procurement shall cover ongoing operations, maintenance and support. The procurement shall also cover the need for further development after the implementation project has ended, as the Contracting Authority assumes that the needs can change during the contract period. An ERP system shall be procured that can be further developed and expanded in line with the business's needs and technological development, in particular regarding the need for increased digitalisation and streamlining of processes. This includes, among other things, new modules, functionality, integrations and the accompanying services within the natural area of use of the ERP system, including, among other things, finance, procurement, HR, reporting, automation/KI and integrations. The procurement therefore includes an option for future procurements and development of new versions of the system, as well as additional services so that the system can support the contracting authority's needs in the future as well.
