Pealkiri: OAS - Education administrative system Lillehammer Øyer and Gausdal

Kirjeldus: Lillehammer, Øyer and Gausdal municipalities are carrying out a joint procurement of education administrative systems for the municipalities' services in nurseries, primary and lower secondary schools with before-and-after-school care, educational-psychological services (PPT) and adult education. The procurement will be carried out in cooperation with the municipalities' joint ICT supplier IKOMM AS, who can assist with mercantile execution and project management. The education area in the three municipalities combined constitutes a comprehensive and socially critical service area with considerable complexity and large requirements for efficient interaction, information security and long-term development of the systems. The municipalities have a total of approx. 41,000 inhabitants and an education area consisting of municipal and private nurseries, primary and secondary schools, before-and-after-school care, PPT services and adult education. The procurement will be carried out as a negotiated procedure in accordance with part III of the regulations (EEA notice) and based on SSA-L with the accompanying annexes. The municipalities have chosen a modular procurement strategy to facilitate the best possible combination of functionality, quality, user friendliness and further development within the different disciplines. The procurement is therefore divided into the following sub-contracts: * Sub-contract 1 - Nursery administration * Sub-contract 2 - Primary and secondary schools and before-and-after-school care * Sub-contract 3 – PPT * Sub-contract 4 - Adult education Tenderers can submit tenders for one, several or all sub-contracts. Each sub-contract will be evaluated, assessed and awarded individually. The contracting authority reserves the right to enter into a contract with one or several tenderers. At the same time, the municipalities would like to ensure uniform and future orientated system architecture across the sub-contracts. Integrations, interface and interaction between the systems will therefore be a central theme in the competition. Tenderers shall describe how the systems support interaction between the sub-contracts, as well as integration with other municipal system portfolios and relevant national joint components. Separate requirement documents (Annex 1) have been prepared for each of the 4 sub-contracts in addition to the common requirement areas. The requirements will describe the functional, technical and integration needs within each discipline. The municipalities attach great importance to information security, privacy and the suppliers' ability to long-term further

development of the systems. The systems shall support the processing of sensitive personal data for children, pupils and users of the services, and at the same time facilitate efficient and user friendly work processes for employees, guardians and administration. The procurement shall contribute to modernising and further development of the municipalities' digital education services, with the aim of increasing quality, better interaction and more efficient administrative processes over time.

Äritegevus on peatatud: Specify why, under the mentioned circumstances, one is able to carry out the contract, considering the current national provisions and measures for continuing the business activities? It is not necessary to provide this information if rejection of tenderers in such a situation is obligatory in accordance with the current national law with no exceptions, when the tenderer is still able to carry out the contract.

Maksude tasumise kohustuse rikkumine: Has the tenderer not fulfilled all of his tax and duty obligations in both the country where he is established and in the contracting authority's member state, if this is a different country than what he is established in?

Terroriakti toimepanek või terroristliku tegevusega seotud õigusrikkumised: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, in the event a legal verdict has been convicted of acts of terrorism or criminal acts connected to terrorist activities by a verdict handed down no more than five years ago, or a rejection period set directly in the judgement that still applies? Acts of terrorism or criminal acts relating to terrorist activity as defined in Article 1 and 3 of the Council's framework decision 2002/475/RIA of 13 June 2002 on combating terrorism (EFT L 164, of 22.6.2002, p. 3). This rejection reason also includes incitement to, participation or attempts to commit such actions as included in Article 4 in the mentioned framework decision.

Ametialaste käitumisreeglite rikkumine kaitsealaste riigihangete valdkonnas: Is the tenderer himself or a person, who is a member of the tenderer's administration, management or supervisory body, or has the competence to represent or control or make decisions in such bodies, have been legally convicted of offences regarding professional behaviour in defence procurements?

Usaldusväärsuse puudumine riigi julgeolekule avalduvate ohtude välistamiseks: Is the tenderer assessed to lack the reliability necessary to exclude the risk of national security?

Ainult siseriiklikest kõrvalejätmise alustest tulenevate kohustuste rikkumine: The contracting authority shall state that in Norway there are national rejection reasons. These shall be described in the procurement documents. Tenderers must respond to whether they are in one or more of the situations described in the national rejection reasons.

Kirjeldus: An assessment has been made of environmental requirements and environmental weighting in the procurement in accordance with the procurement regulations and the Public Procurement Regulations § 5. The procurement concerns a standardised software service /SaaS system where the environmental impact is mainly indirectly and to a limited degree affected by the actual competition or the evaluation of the tenders. Environmental requirements in this procurement are considered not to have sufficient real management effect or be suitable for separating the tenders in an objective and competitive relevant manner. The procurement is, therefore, instead aimed at conditions that are considered to be of greatest importance for goal achievement and social benefit, including functionality, security, integrations, service quality, lifecycle costs and sustainable operation through cloud based standard systems. Based on this, it is assessed as proportional and professionally justified not to use the environment as a separate award criteria in this competition.

Kirjeldus: An assessment has been made of environmental requirements and environmental weighting in the procurement in accordance with the procurement regulations and the Public Procurement Regulations § 5. The procurement concerns a standardised software service /SaaS system where the environmental impact is mainly indirectly and to a limited degree affected by the actual competition or the evaluation of the tenders. Environmental requirements in this procurement are considered not to have sufficient real management effect or be suitable for separating the tenders in an objective and competitive relevant manner. The procurement is, therefore, instead aimed at conditions that are considered to be of greatest importance for goal achievement and social benefit, including functionality, security, integrations, service quality, lifecycle costs and sustainable operation through cloud based standard systems. Based on this, it is assessed as proportional and professionally justified not to use the environment as a separate award criteria in this competition.
