2.1. Menetlus

Pealkiri: Opgradering af MR-scanner til dyr

Kirjeldus: This purchase is for a partial upgrade of existing equipment for small-animal high field magnetic resonance imaging (MRI). The MRI system is a Bruker Biospec and we intend to upgrade this system by replacing electronic components but leaving in place the large magnet which is a core component of the scanner system. This means that only Bruker components can interface to the existing magnet. Another central aspect of the upgrade concerns our cryo surface array coil for rodent brain imaging. This is a specialty item only offered by Bruker and can therefore only be interfaced to and upgraded with Bruker hardware. Additionally, the hardware works only through proprietary control software developed and supplied by Bruker. For these reasons, the upgrade is only possible with Bruker component.

5.1.16. Lisateave, lepitus ja vaidlustus

Vaidlustusorgan: Klagenævnet for udbud

Teave vaidlustamise tähtaegade kohta: Following the notification, a standstill period of 10 calendar days will be held in accordance to paragraph 3 of Act No. 593 of 2 June 2016 on the Danish Act on the Complaints Board for public Procurement. This implies that the Contracting Authority cannot sign the Contract with the winning Tenderer before the standstill period has expired. In case of complaints about tenders or decisions, e.g. award of contracts covered by Section II or III in the Danish Public Procurement Act must be submitted to the Complaints Board for Public Procurement (Klagenævnet for udbud) within 45 calendar days from the day after the contractor published a notice in the Official Journal on the conclusion of a contract. At the latest concurrently with submission of an appeal to the Complaints Board for Public Procurement, the complainant must inform the Contracting Authority of the alleged infringement, and whether the appeal is to be referred to the board.
