Pealkiri: Blood Gas Analyzer for the Perfusion System at the New Children's Hospital

Kirjeldus: The HUS Group (hereinafter also referred to as the "Contracting Authority") requests tenders for a blood gas analyzer for a perfusion system (hereinafter also referred to as the "Device") to be procured for the Anesthesia and Operating Unit of the New Children's Hospital. The subject of the procurement is a blood gas monitoring system for a heart-lung machine, with the objective of improving patient safety and supporting real-time clinical decision-making. The Device enables continuous monitoring of blood parameters during the use of the heart-lung machine. The Device must be capable of integration with the Apotti (Epic Hyperspace) Electronic Medical Record / patient information system either via Capsule or through the interface port of the heart-lung machine. Data shall be transferred in real time to Apotti's perfusion information management system during the use of the heart-lung machine. Apotti is an Epic Hyperspace based EMR provided by Epic Systems. More about Apotti: <https://www.apotti.fi/en/apotti/> A more detailed description of the subject matter of the procurement is provided in the Invitation to Tender and its appendices. The procurement concerns the acquisition of one (1) Device and cannot be divided into separate lots. The option will be reserved for the purchase of one (1) additional Device corresponding to the subject matter of the procurement during 2027-2029. The additional option Device shall be purchased at the same price as the Device offered by the Supplier. The contracting entity will decide on the use of the option separately. The scope of the procurement also includes (all) device-specific consumables related to the products offered, which are needed in the intended use of the device (including, but not limited to, a calibration device), as well as complementary products to the devices. The contracting entity does not commit neither to the possibly stated euro amounts and nor the consumption figures indicated in the invitation to tender. The final order quantities may be higher or lower than stated.

Menetluskorra kirjeldus: The procurement shall comply with the Act on Public Procurement and Concession Contracts (1397/2016, referred to as the Public Procurement Act). The

procurement value exceeds the EU threshold value. The procedure shall be an open procedure as defined in section 32 of the Public Procurement Act. **PROCESSING OF TENDERS** The procedure shall include the following phases: Contracting entity 1. Opens the tenders 2. Verifies the suitability of the tenderer 3. Checks that the tenders conform to the invitation to tender 4. Compares the tenders 5. Makes a procurement decision and communicates it to all the tenderers 6. Requests and checks certificates and reports on the suitability of the winning tenderer(s) 7. Concludes an agreement with the selected tenderer(s) In steps 2.-5. a contracting entity may (i) select as the winner of the competitive tendering the tenderer best evaluated on the basis of the comparative criteria; or (ii) move to a negotiated procedure. A negotiated procedure may be used if: (i) the competitive tendering procedure did not result in tenders that match the call for tenders; (ii) no tenders could be accepted due to a too high price or other reason; or (iii) HUS deems it necessary to negotiate the details of the tenders **LANGUAGE OF THE COMPETITIVE TENDERING PROCEDURE** The procurement documents are available in English. If a tenderer needs the documents in another language, the tenderer shall be responsible for translation and liable for the associated costs. Tenders must be prepared in English or in Finnish. **PARALLEL TENDERS** Parallel tenders are not permitted. **PARTIAL TENDERS** Partial tenders will not be accepted.
