2.1. Menetlus

Pealkiri: Framework agreement for the procurement of digital joint user equipment/AV equipment and accompanying services.

Kirjeldus: The objective of the procurement is to enter into a framework agreement for the procurement of "digital joint user equipment/AV equipment and accompanying services". The agreement will cover the need for digital joint user equipment (DFB) for all entities and buildings where Bærum municipality is responsible for such joint equipment. The municipality has separate agreements for client equipment.

Menetluse tunnus: f7e91ed9-7595-4292-9c92-b2e06ae58ca1

Sisemine tunnus: 2026/7312

Menetluse liik: Avatud

Kiirendatud menetlus: ei

Menetluskorra kirjeldus: The intention is that the agreement shall cover Bærum municipality's total need for digital joint user equipment/AV equipment, entertainment, meeting room equipment, accessories and accompanying services in the contract period. The agreement shall ensure that the municipality always has access to updated equipment/products and services of modern and good quality. Consultancy services are included as a part of the framework agreement. The tenderer shall, if needed, be able to assist the Customer with professional advice connected to assessment and any supplementation of equipment, as well as support and maintenance related services. Expanded support and operative assistance from the supplier can be relevant for major events and video conferences. The current equipment is owned by the municipality and is located in many different locations around the municipality. The contracting authority has approx. 1,350 meeting rooms and classrooms that will be used by approx. 30,000 end-users. In addition the contracting authority has approx. 950 TVs/info-monitors at the municipality's different locations (e.g. resident rooms etc.). The contract shall as a minimum cover the following areas (see annex 3 – Annex 1 the Contracting Authority's requirement specification): Procurement and assembly of meeting room equipment and AV equipment, including monitors, projectors, control units, cabling, disassembly and equipment management. Waste management (safe collection, sorting and recycling of electronic waste, as well as embalage etc.) Necessary additional equipment and servicesService, support and maintenance of equipment delivered by the tenderer in this

contract, Consultancy related to design, system, installation, maintenance, improvements, further development, phasing/disposal etc. The procurement shall also include advice and guidance for call-offs/orders for this contract. The current equipment is subject to great uncertainty as regards age and condition, and it is the services/service locations themselves who have mainly been responsible for procuring the current equipment. As a starting point, we would like to keep the equipment for as long as possible. Each unit itself makes the orders/call-offs it needs in the area covered by the agreement. Invoices shall be directed to the service locations. Equipment shall be delivered to the municipality's users and locations and an increased degree of automation is wanted around operation and service. The need for common meeting room equipment may change in the future, so there is uncertainty regarding call-offs on the new contract. Bærum municipality procured more than 1,700 monitors, including the accompanying equipment and necessary equipment, delivered during the last five years of use. Based on the size and consumption of the current equipment, and taking into account the general price rise, a combined annual amount of approx. NOK 3-10 excluding VAT is estimated. There is great uncertainty connected to future withdrawals and needs, while the annual call-offs will depend on financial framework terms, political decisions and the market situation in general. The contract does not carry any purchasing obligation for the contracting authority.
