Ilmoituksen nimi: Establishment, operation and maintenance of 24 hour resting place along the E6 Oslo-Moss

Kuvaus: The Norwegian Public Roads Administration invites tenderers to a competition for the establishment, operation and maintenance of a 24 hour resting place for heavy transport along the E6 on the Oslo – Moss stretch. The contracting authority needs approx. 150 placement places on the stretch. It may be necessary to enter into a contract with several tenderers and /or divide the procurement into different sub-contracts. Each individual 24 hour resting place shall as a minimum have parking places for 20 wagon trains and shall include a service facility with toilets, showers and charging stations. Otherwise, the 24 hour resting place shall fulfil the shall-requirements listed in point 3.2. The Contracting Authority prefers large 24 hour resting places and 24 hour resting places that are located in/near Oslo. If we only get tenders for the stretching Vestby-Moss, there is a need for less than 150 placement places, and the need is probably under 70 placement places. The 24 hour resting place shall be ready for opening at the latest 24 months after the contract has been signed and the contract will apply for 10 years from the opening hours. The contracting authority has the option to extend the contract for 1+1 year, so that the total possible lease period is 12 years. The charging infrastructure shall be completely developed and in operation in accordance with point 3.2 h. An electronic tender conference will be held for Teams 23.06.2026(12:30). Registration for the tender conference will be done by sending the name and email address via the communication channel (message) in KGV by 22.06.2026 at 15:30.

Kuvaus: There is no requirement for 30% weighting of climate and environmental considerations. The contracting authority can replace climate and environmental considerations in the award criteria with climate and environmental requirements in the requirement specification, if it is clear that this gives better climate and environmental effect. Several different requirements are made in the requirement specification, including: - All areas that must be developed shall have an asphalt EDP that is lower than 60 kg/tonne in accordance with NS-EN 15804+A2:2019. - Charging stations shall be established for electric lorries. - Cleaning shall be carried out with environmentally friendly products. It has been considered that the effect of setting these requirements (especially the first two hyphenated points) gives a better effect than a possible achievement, if they were used as the award criteria. The requirements and effectiveness of the above requirements are, in our opinion, sufficient to use the exception in PPR § 7-9 (4).
