2.1. Procédure

Titre: Kvalifisering_Anskaffelse erp system

Description: Lunera Energi AS is faced with the need to replace the current over 20 separate and non-integrated systems with an integrated and centralised ERP system that covers the core functions finance, payroll, HR and operation and maintenance. The procurement includes a system, establishment and operation and administration of the system. The system can consist of one or several systems that together cover all, several or one core function(s). The current system solution presents challenges connected to data consistency and a lack of automation. The procurement shall ensure a standardised, cloud-based ERP system that provides better interaction, increased efficiency and improved decision support. Furthermore, it is a central goal that the Contracting Authority shall be able to operate independently by the end of the fourth quarter of 2026, thereby ending transitional agreements with Statkraft. The ERP system must be flexible in order to support the company's long-term strategy and growth ambitions up until 2030. Emphasis will also be put on cost efficiency and simple management through a standardised architecture with a low degree of adaptation, as well as a safe transition to independent operations with clear contracts and reduced supplier risk. The implementation shall be completed by 2026, with the possibility for further development and additional modules afterwards. Tenderers can submit tenders for only part or all of the delivery, i.e. tenders for the following parts: Finance, payroll and HR Operations and maintenance. The contracting authority opens up so that tenderers can connect with sub-suppliers in order to deliver.
