Ainm: Quality

Cur síos: Quality • Implementation ability • Functionality and user friendliness When evaluating the tenders, both fulfilment and fulfilment of A* and B requirements will be assessed positively. B requirements allow for additional points without non-fulfilment, whilst the A* requirements reward solutions that go beyond the minimum. The assessment will therefore emphasise how well the tenderer describes an implementation model that ensures safe and effective implementation, including clear roles, good organisation and a take-over process that enables the municipality to operate the system itself. In addition the contracting authority will emphasise how well the system functions in practice for both employees and residents.

Systems that offer more and more flexible notification methods, better digital supervision, more precise positioning, wider sensor support or a more intuitive administration interface will be considered more values. Tenders that provide increased security, simple operation and better adaptation to the users' needs will therefore be able to achieve a higher score. Documentation: • Implementation ability -Description of how the delivery is intended to be carried out, including time, roles and organisation. -Description of the real competence of the offered key personnel. -Description of hand over procedures to the Contracting Authority. A* requirements that are evaluated here: - 2.10.1 • Functionality and user friendliness -Tenderers shall describe the system's functionality with a view to user friendliness for both users and employees in Vanylven municipality. Ainm: Service and maintenance

Cur síos: • Fulfilment of service and support. When evaluating the tenders, fulfilment and fulfilment of A* requirements within service and maintenance will be assessed positively. A* requirement rewards suppliers who offer more than a minimum. The contracting authority will particularly assess how well the tenderer documents a robust and predictable support function that ensures stable operation over time. The evaluation will particularly emphasise the tenderer's ability to provide stable and predictable support, including a quick and measurable response time in accordance with SLA, good documentation of routines, and a dedicated customer responsible who ensures continuity of dialogue and follow-up. Systems that provide increased operational security, high availability in the event of errors, proactive notification or follow-up mechanisms, or clear processes for reporting and quality control can achieve a higher score. The aim is to identify tenderers who not only meet the minimum requirements, but who give the municipality security for stable operation and quick help when needed.

Documentation: • Solution description -Tenderers shall prepare a solution description that describes how the requirements in chapter 2.11 in Annex 1 are to be solved. A* requirements that are evaluated here: - 2.11.1 - 2.11.2 - 2.11.3
