#### **II.1.4. Cur síos achomair**

Karolinska Institutet invites companies, to submit tenders concerning a Metabolic platform (System).

The contract will be used by the Department of Medicine, endocrinology and metabolism, Karolinska Institutet (KI), Huddinge.

Our research unit focuses on metabolism and utilizes murine models. An important readout in metabolic research is energy expenditure and macronutrient utilization. Therefore, we wish to purchase a metabolic platform for indirect calorimetry measurements, measurements of stable isotopes in the carbon dioxide, locomotor activity measurements, food intake measurements and body weight measurements. We also need the platform to be compatible with tests for mental and cognitive function for simultaneous measurements of metabolic features.

Invitation to tender

Karolinska Institutet, hereinafter called KI, invites companies, hereinafter called Tenderers, to submit tenders concerning a Metabolic platform (System).

The contract will be used by the Department of Medicine, endocrinology and metabolism, Karolinska Institutet (KI), Huddinge.

Karolinska Institutet, KI

Karolinska Institutet (KI) is one of the world's leading medical universities. Our vision is to advance knowledge about life and strive towards better health for all. Karolinska Institutet accounts for the single largest share of all academic medical research conducted in Sweden and offers the country's broadest range of education in medicine and health sciences. The Nobel Assembly at Karolinska Institutet selects the Nobel laureates in Physiology or Medicine. For additional information, please visit [www.ki.se](http://www.ki.se).

Scope of the procurement

One (1) Metabolic platform(System), as specified in this RFT.

Background to the procurement

Our research unit focuses on metabolism and utilizes murine models. An important readout in metabolic research is energy expenditure and macronutrient utilization. Therefore, we wish to purchase a metabolic platform for indirect calorimetry measurements, measurements of stable isotopes in the carbon dioxide, locomotor activity measurements, food intake measurements and body weight measurements. We also need the platform to be compatible with tests for mental and cognitive function for simultaneous measurements of metabolic features.
