:

An bonn cirt le dámhachtain dhíreach: An soláthróir bunaidh soláthairtí nó suiteálacha atá ann cheana a pháirt-athsholáthar nó a shíneadh agus é sin ordaithe de réir na gcoinníollacha diana atá luaite sa Treoir

Bonn cirt eile: The Hospital Ålesund wants the same type of washer decontaminators that have already been purchased so that the machinery is uniform. The machines shall use the same return channel for washing inserts and the channel shall also be reused in the new building. The new machines must therefore be compatible with the existing machines. The sterile central shall set up a work flow where all stakes shall fit into all machines, as well as be compatible with input tables (trolleys) on both the reindeer and urein sides. The department does not have physical space for double sets in case of compatibility between different machines. In addition, the department sees the advantage of servicing of the machinery connected to only one supplier, as it is believed that this will be both time and cost saving as minor administration of the equipment is required.
