Cineál: Cáilíocht

Ainm: The tenderer's offered system

Cur síos: Orientation: Under this award criteria, an evaluation will be made on the tenderer's offered system via a digital presentation in real time where the customer can provide a selection of managers and elected representatives. This presentation must include the possibility for a customer to ask questions. During the evaluation phase the tenderer will be contacted by the customer and a team meeting will be agreed where the presentation will take place. Tenderers must be able to provide a team meeting on just a few days' notice.

Tenderers shall present the following: Set up and start up how rota rules and working hours rules are recorded, administered and maintained in the system. how local agreements, special agreements and exemptions can be registered and managed how the solution handles individual exceptions or adaptations in the regulations for individual employees how the system signals deviations, breaches or risks of breaches connected to the Working Environment Act and other relevant rules. An overall assessment of the offered system will be carried out during the evaluation. The award criteria will be evaluated on the basis of the tenderer's presentation of the 3 above points. The contracting authority will particularly emphasise the evaluation: Set-up and rule handling A positive assessment will be made if the solution provides a simple, structured and secure way to register, administer and maintain rota rules, working hours rules, local agreements, special agreements, exemptions and individual exceptions. A positive assessment will also be made if the system clearly warns of deviations, fractures or risk of breaches and if such signals are understandable and easy to follow-up. Work flow and user friendliness An assessment will be made positive if the system has an intuitive and efficient work flow for employees, managers and rota planners. The contracting authority will emphasise how easy it is to register inputs and preferences, prepare the basis for rota generation, generate rotos, understand the proposals that are presented, and follow up deviations and signals. A positive assessment will also be made if the system greatly reduces the need for manual assessments and inspections. Prioritising, explainability and control A positive assessment will be made if the system, in a clear and verifiable manner, shows how it priorities between legislation and contracts, competence needs, manpower plan, continuity, fair distribution of shifts, employees' wishes, individual facilitation needs and cost efficiency. Furthermore, a positive assessment will be made if the solution explains why a rota proposal has been generated, what rules and considerations form the basis, what conditions could not be completely fulfilled, and what consequences changes or overrides have. Best solution will be awarded 10 points. Other tenders will be awarded points based on a judgement of relevant quality differences compared to the best system. The tenderer's point score for the award

criteria is weighted with the award criteria's stated weighting percentage. The tenderer's total points for this award criteria is weighted with the award criteria's weighting percentage.

Catagóir an critéir dhámhachtana meáchain: Ualú (céatadán, beacht)

Uimhir an chritéir dhámhachtana: 60

Critéar:

Cineál: Cáilíocht

Ainm: Environment

Cur síos: The contracting authority uses the exclusion provisions in loa § 5b third section and does not weight climate and environmental considerations in accordance with the second paragraph. The contract is assessed to have a climate footprint and an immaterial environmental impact, and this is justified below. The nature of the procurement in this case is the procurement of a KI based rota tool that shall assist with rota planning. Furthermore, the procurement involves maintenance and further development of such a tool, operation and use of the tool. The work on maintenance and further development of the tool can be compared with a consultancy service without particular travel activities and is therefore considered to have immaterial climate footprint and environmental impact. The energy consumption and any environmental impact of this system is very limited and it is aimless for the contracting authority to emphasise or set requirements in the environmental requirement specifications in this procurement. Based on this, the procurement of KI-based rota tools is assessed in accordance with immaterial climate footprint and environmental impact, and thus falls under the exception rule in loa § 5b (3).
