5.1. Luchtóg: LOT-0001

Teideal: Fire alarm centres, reading systems and smoke hatches - k.

Cur síos: Tromsø municipality needs a framework agreement that includes inspections, service and maintenance of fire alarm systems, management systems and smoke hatches in Tromsø municipality's properties. Inspections shall be carried out in accordance with current standards and regulations. The framework agreement will also apply if the current properties operated by Tromsø municipality are transferred to a municipal company. The framework agreement will also apply for properties that Tromsø municipality and municipal companies acquire during the framework agreement period. The contracting authority's need consists primarily of inspections and service of existing installations and, thus, improvements to defects uncovered by the inspections. Furthermore, the contracting authority needs the contract to cover investments in cases where the contracting authority considers it most cost efficient to replace the entire facility rather than improve deviations from inspections. See the standard contract point 2.5 for further information on conceptual claims etc. The contracting authority currently has a separate service and control contract for sprinkler installations. Control and service connected to this will not be included in this contract.
