Cur síos: The contracting authority has assessed the procurement against the public procurement regulations § 7-9 on climate and environmental considerations in public procurements. 18 The procurement is for a framework agreement for purchase, hire, maintenance, supplementing, administration, management and consultancy services connected to software licences and volume licence agreements. The contract is aimed at the dealer chain/licence partner and mainly comprises licence communication, licence administration, support, consultancy and assistance connected to the Contracting Authority's member municipalities' licence portfolios. The contracting authority estimates that the procurement has an immaterial climate footprint and an immaterial environmental impact, cf. the procurement regulations § 7-9 fifth paragraph. The service mainly consists of electronic delivery of software licences and digital services connected to administration, management and consultancy services. The delivery does not normally involve the delivery of physical products, packaging, transport or other physical flows of goods that have a significant climate or environmental impact. The services are mainly expected to be carried out digitally, through electronic communication, digital meetings, reporting and consultancy services. Extensive travel activities are not expected, and the tenderer will only, in exceptional cases, need physical presence at the Contracting Authority or member municipalities. If there is an exception for a need for physical presence at the Contracting Authority or member municipalities, the tenderer shall, where practically possible, carry out the journey in a climate and environmentally friendly manner, for example by the use of public transport, co-driving or zero emission vehicles. The contracting authority is aware that there can be climate footprint and environmental impact connected to underlying software manufacturers, cloud services, data centre operation and the accompanying infrastructure. The tenderer in this procurement,

however, primarily acts as a dealer/licence partner and has limited influence on the manufacturers' underlying production, energy use, data centre operation and technical infrastructure. The contracting authority therefore considers that such conditions are to a limited degree suitable as an award criteria or contract requirements in this procurement. Based on this, the Contracting Authority considers that the terms for exemptions in accordance with the procurement regulations § 7-9 fifth paragraph are fulfilled. The contracting authority will therefore not weight climate and environmental considerations with a minimum of 30 percent in this competition.
