2.1.4. Opće informacije

Dodatne informacije: The contracting authority has chosen to make an exception in the competition from using The Environment as the award criteria 30% based on the following: The contracting authority will not be required to procure a new fire engine that runs on fuel other than diesel. This is based on the municipality's geography, a lack of developed infrastructure for charging/filling alternative fuel. Beyond fuel (emissions of CO2 based on fuel), the contracting authority considers that there are currently not sufficient award criteria to be used that will have a significant effect on the environment. There are, therefore, absolute requirements in the competition for environmental measures: Euro 6 engine requirement (latest and cleanest engine technology) and the desire for a fire engine to use the Miljødiesel system, requirements that together are assessed to give a better environmental effect than using the environment as the award criteria with weighting at least 30%. C.f. the exclusion provisions in the public procurement regulations § 7-5 fourth section.
